Reinaldo Zapata

1 Up (graphone)

sec:up

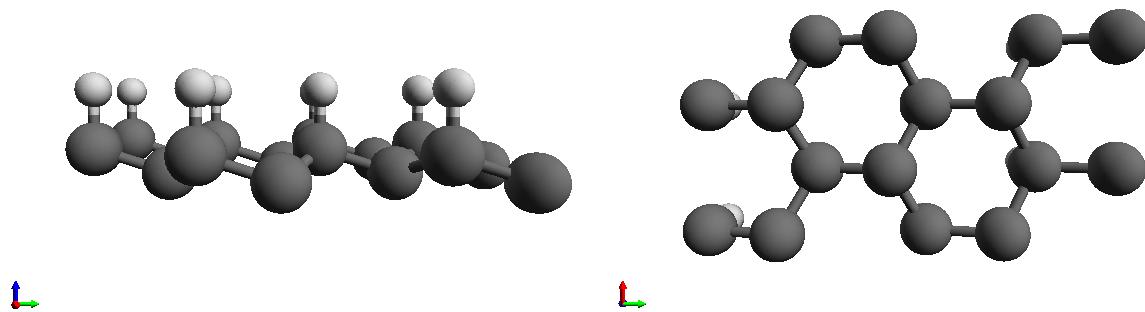

Figure 1: Up structure

fig:upstruc

1.1 \mathcal{V}^{xb} energy range 0.0–0.2 eV

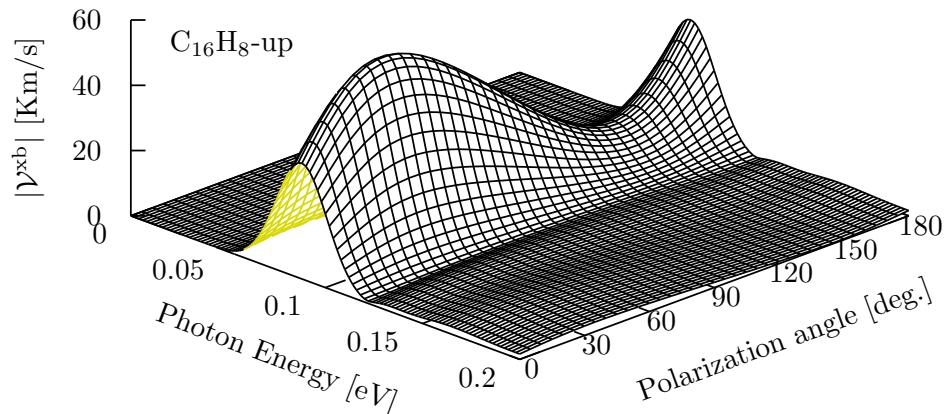

Figure 2: The most intense response for \mathcal{V}^{xb} is for 40°.

fig:up-magvxbincang1

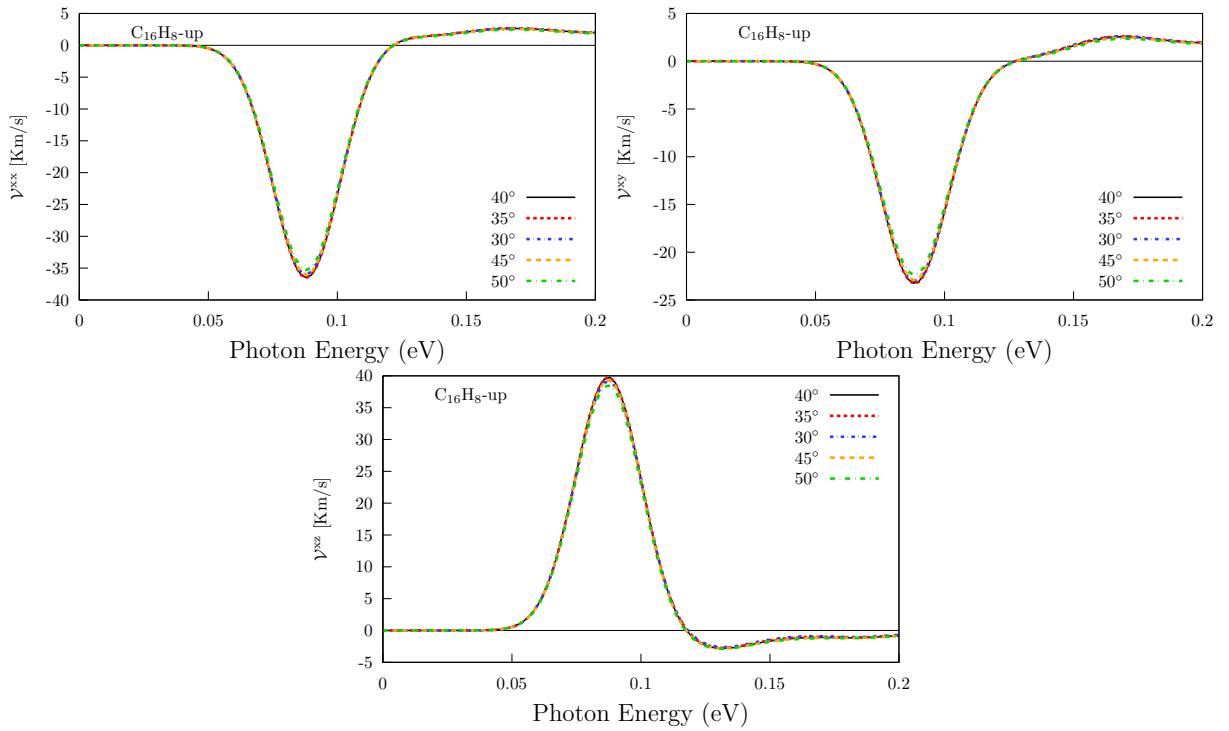

Figure 3: Cheking angle of incidence for xb components for up structure. [fig:up-xbangcomp](#)

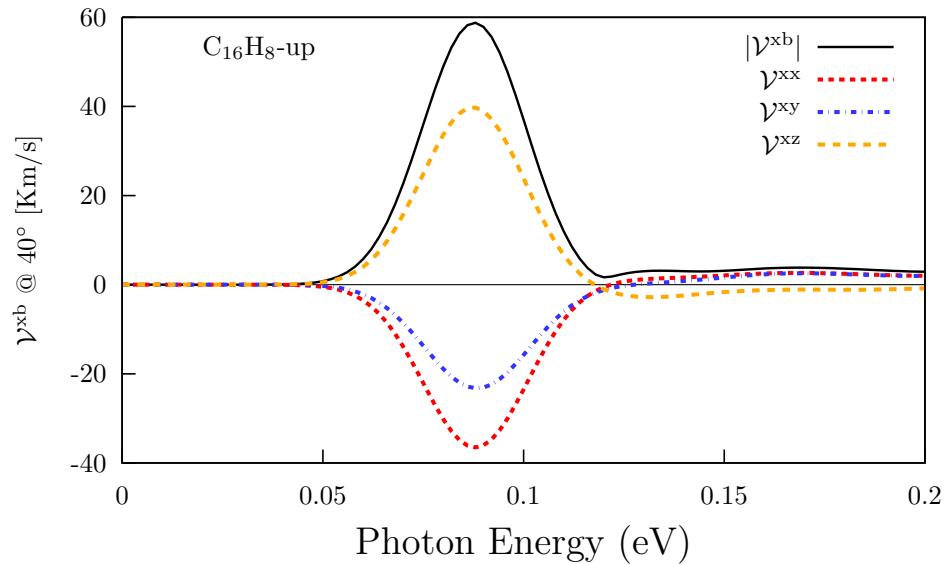

Figure 4: Three components of \mathcal{V}^{xb} @ 40° . [fig:up-vxb1](#)

1.2 \mathcal{V}^{yb} energy range 0.0–0.2 eV

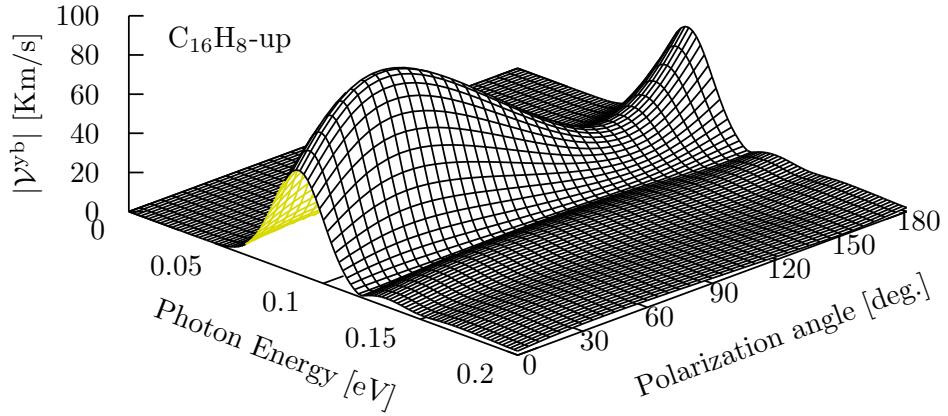

Figure 5: The most intense response for \mathcal{V}^{yb} is for 40° .

`fig:up-magvybincang1`

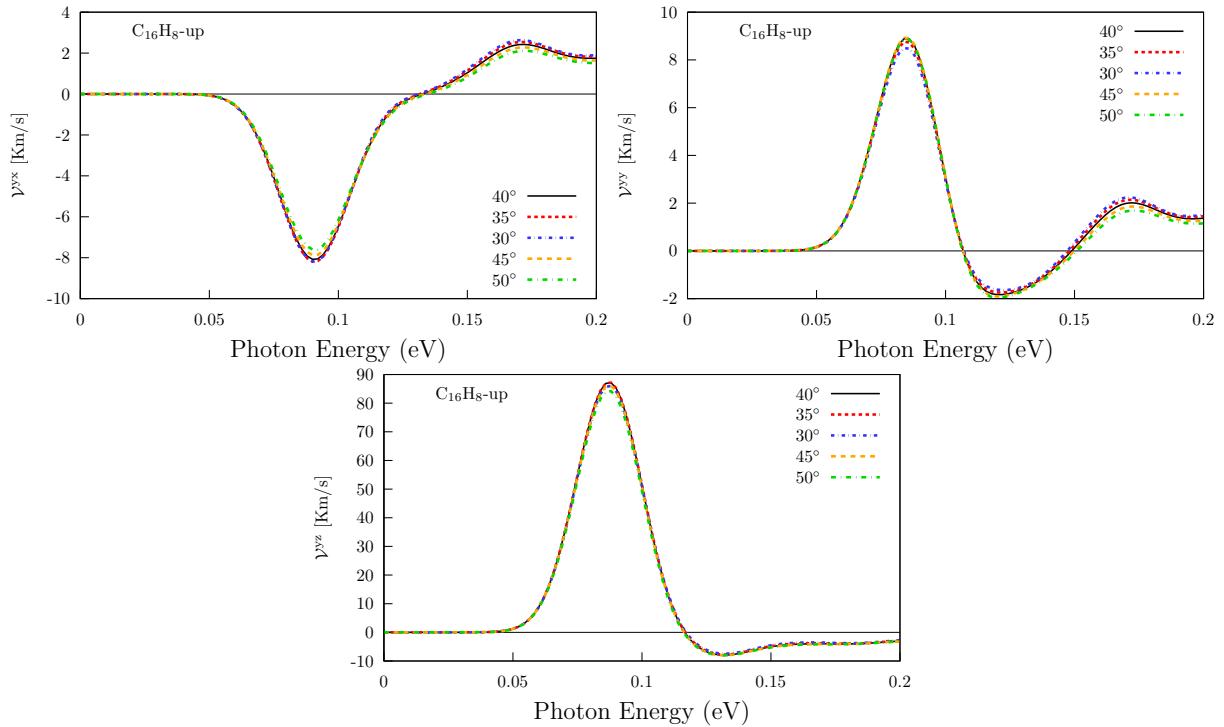

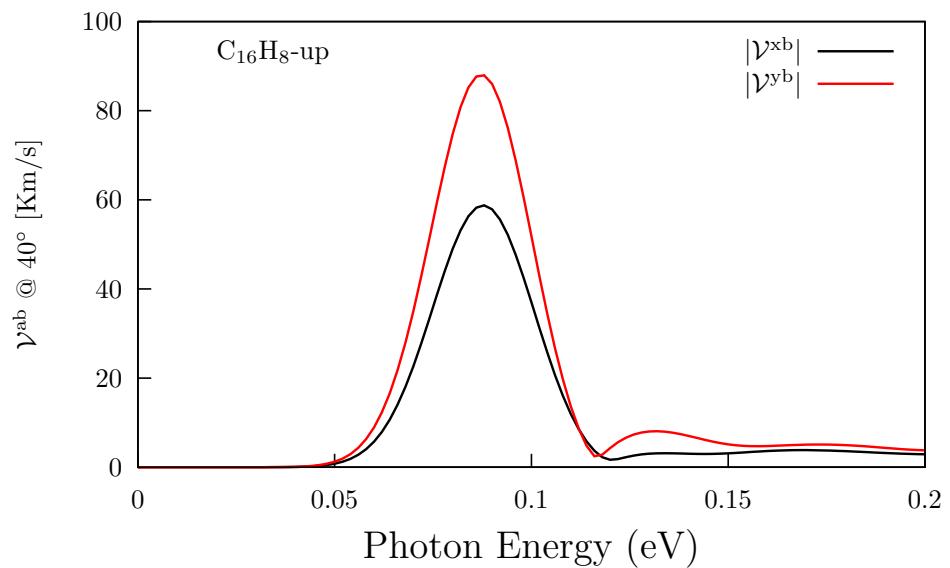

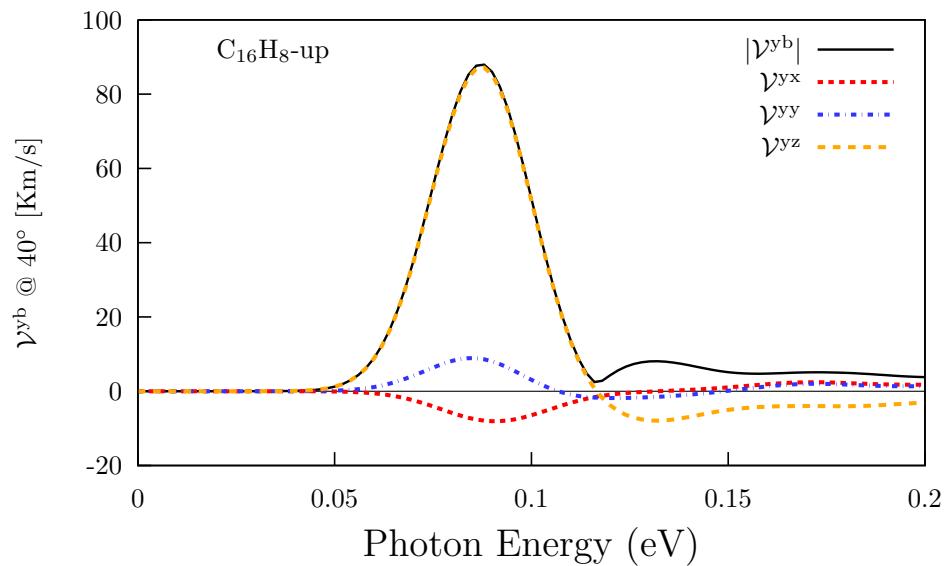

Figure 6: Cheking angle of incidence for yb components.

`fig:up-ybangcomp`

1.3 \mathcal{V}^{xb} energy range 1.8–2.1 eV

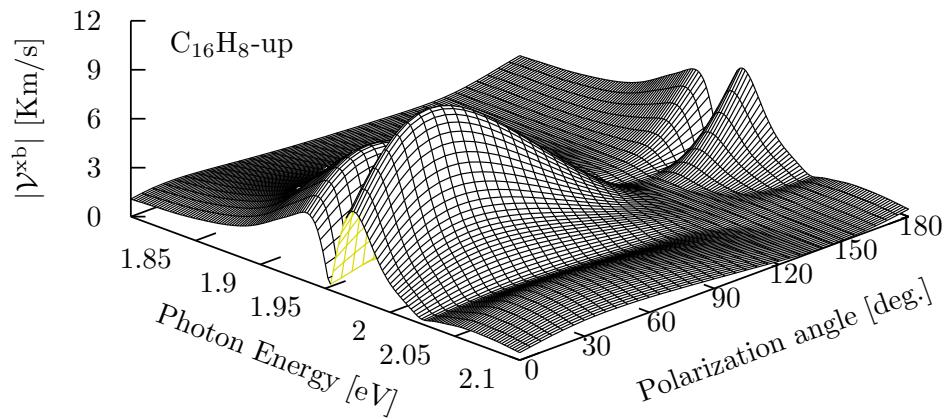

Figure 9: The most intense response for \mathcal{V}^{xb} is for 40°.

`fig:up-magxbincang2`

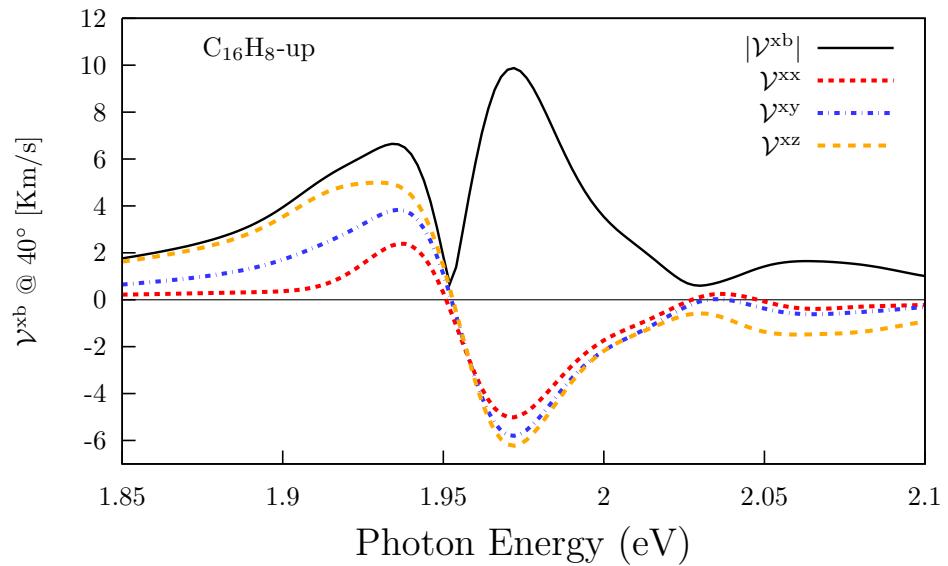

Figure 10: Three components of \mathcal{V}^{xb} @ 40°.

`fig:up-vxb2`

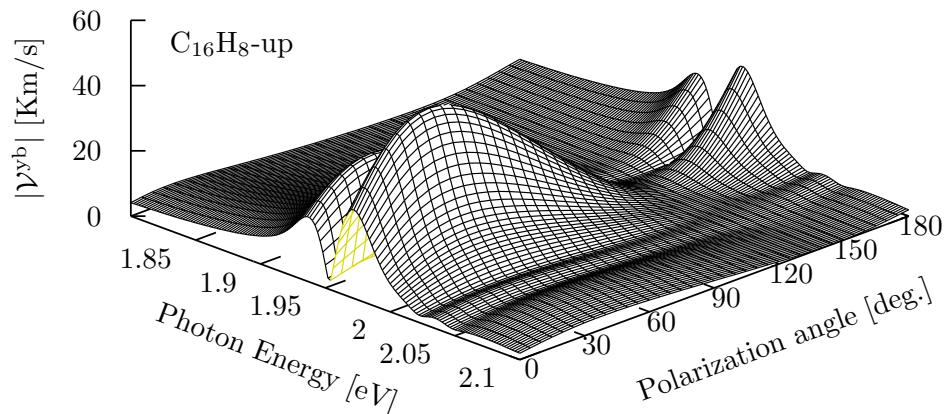

Figure 11: The most intense response for \mathcal{V}^{yb} is for 40°.

`fig:up-magybincang2`

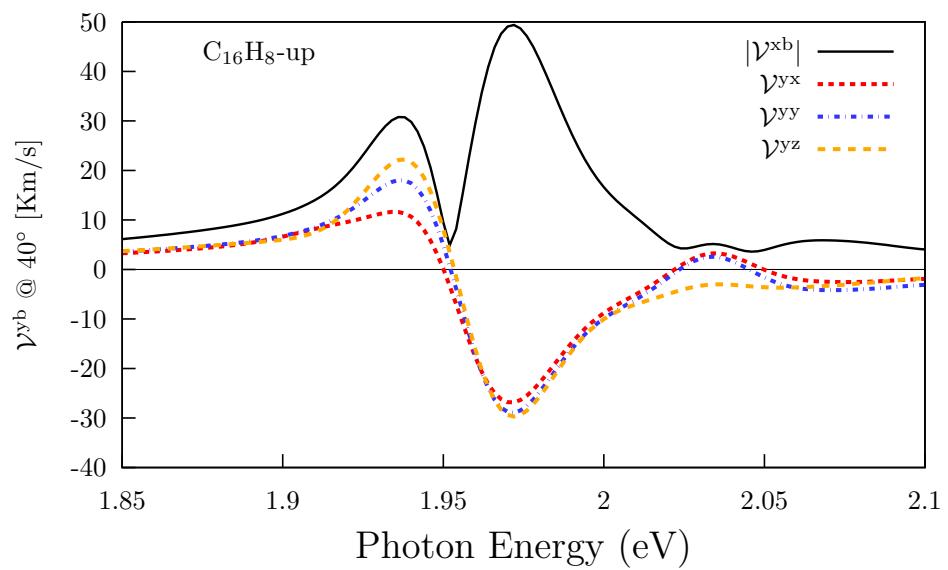

Figure 12: Three components of \mathcal{V}^{yb} @ 40°.

`fig:upvyb2`

1.4 $|\mathcal{V}^{ab}|$, angles θ and φ , layers, and comparison with CdSe and GaAs for the energy range of 0.0–0.2 eV.

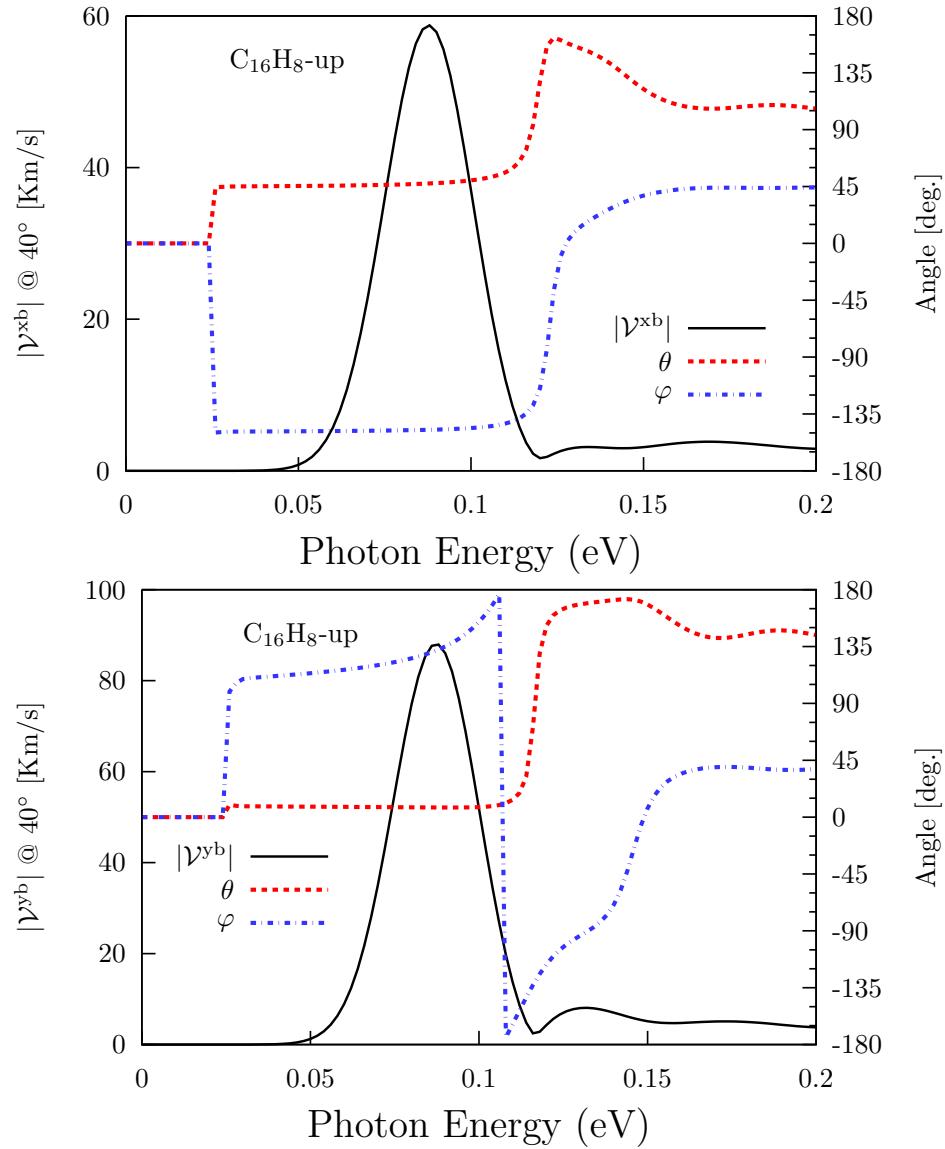

Figure 13: $|\mathcal{V}^{ab}|$ (solid line, leftside scale) and the corresponding angles θ and φ (dashed lines, rightside scale) Fig.13_Ftp1

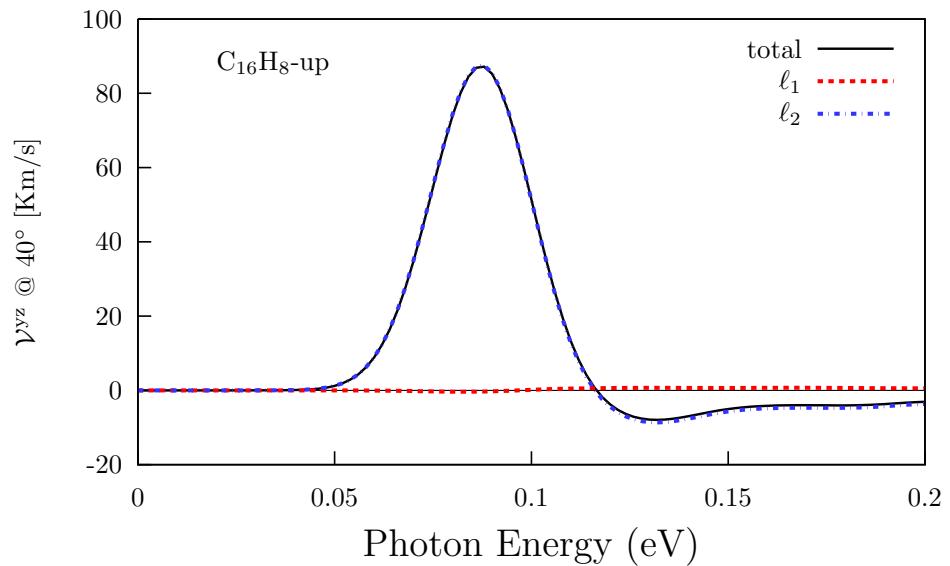

Figure 14: Layer decomposition for the most intense response: \mathcal{V}^{yz} .

`fig:up-lay1`

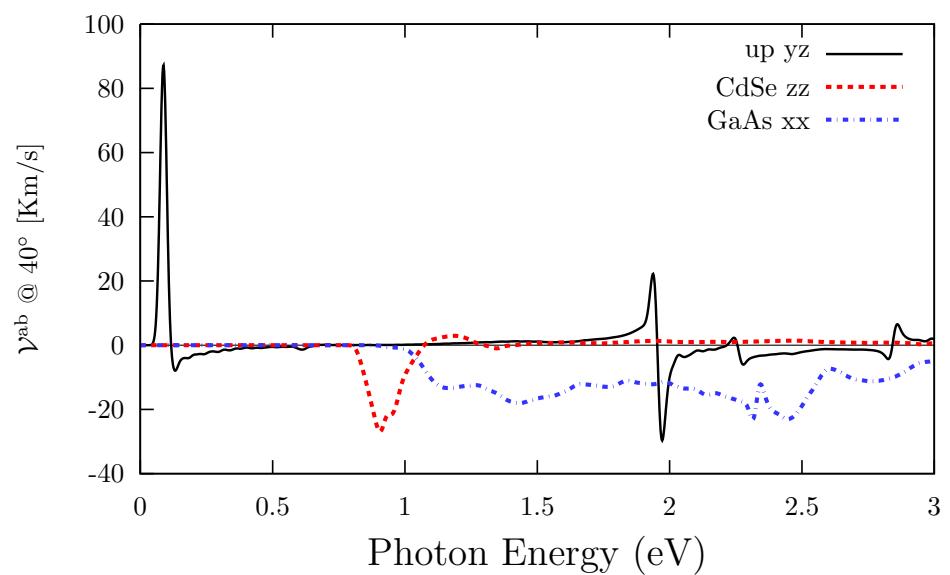

Figure 15: Comparissoin of the most intense response vs the most intense responses of CdSe and GaAs.

`fig:up-comp1`

1.5 $|\mathcal{V}^{ab}|$, angles θ and φ , layers, and comparison with CdSe and GaAs for the energy range of 1.8–2.1 eV

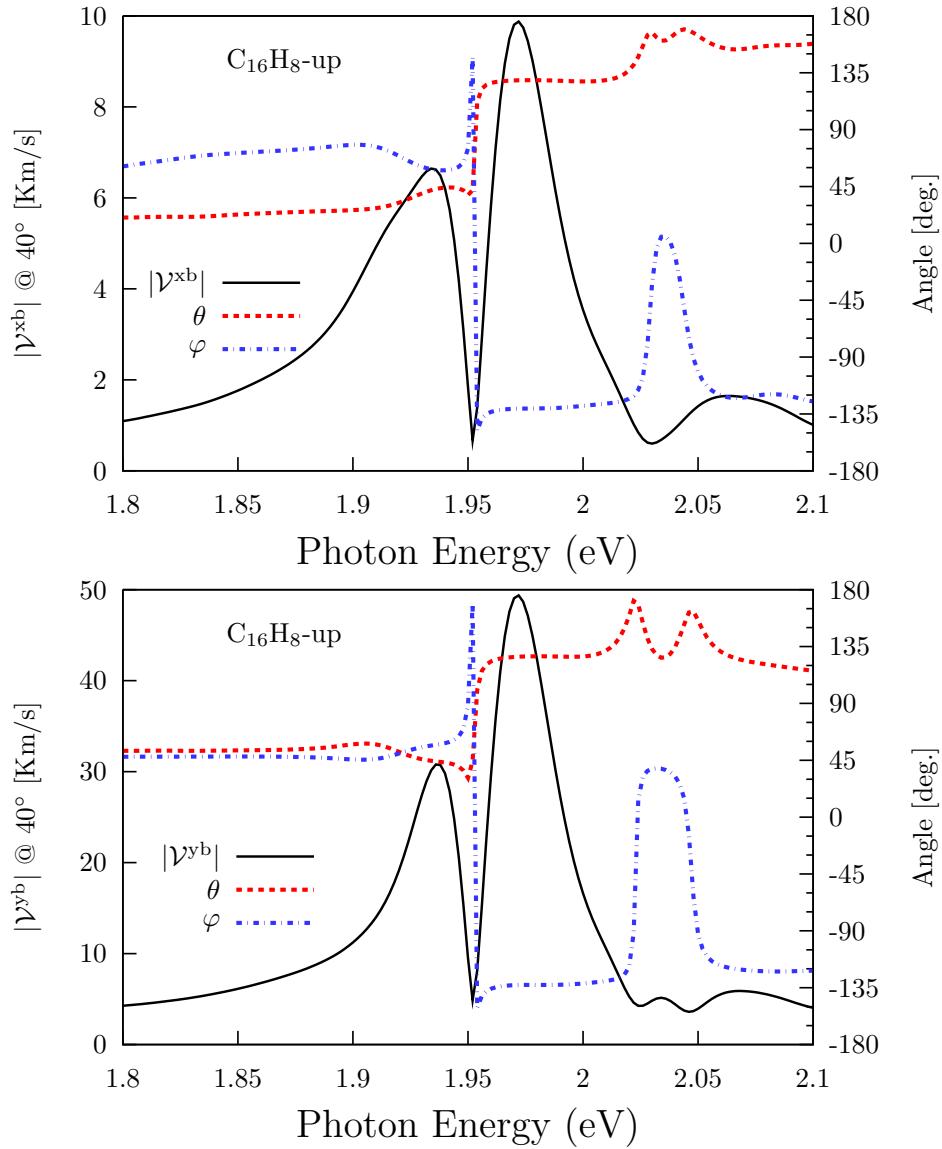

Figure 16: $|\mathcal{V}^{ab}|$ (solid line, leftside scale) and the corresponding angles θ and φ (dashed lines, rightside scale) Fig.16_Ftp2

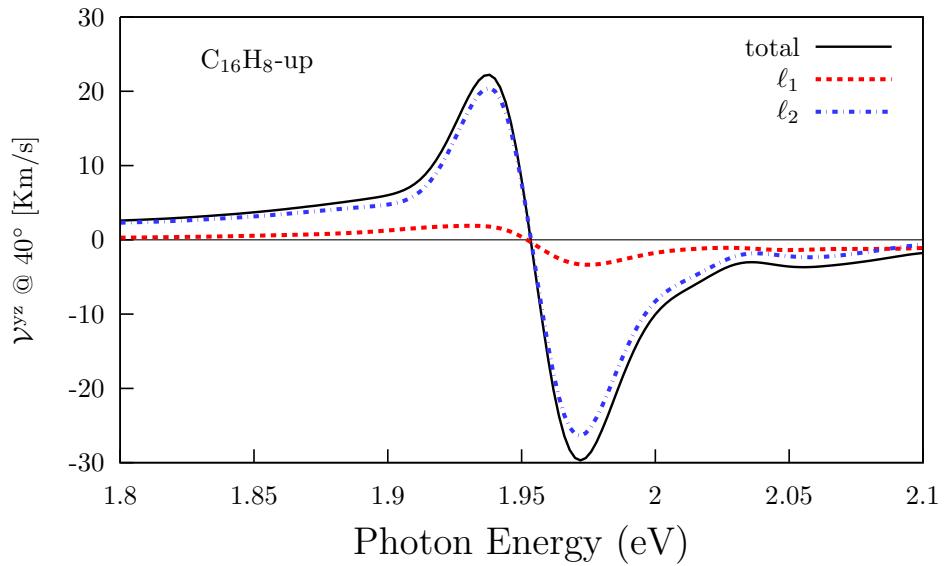

Figure 17: Layer decomposition for the most intense response: \mathcal{V}^{yz} .

`fig:up-lay2`

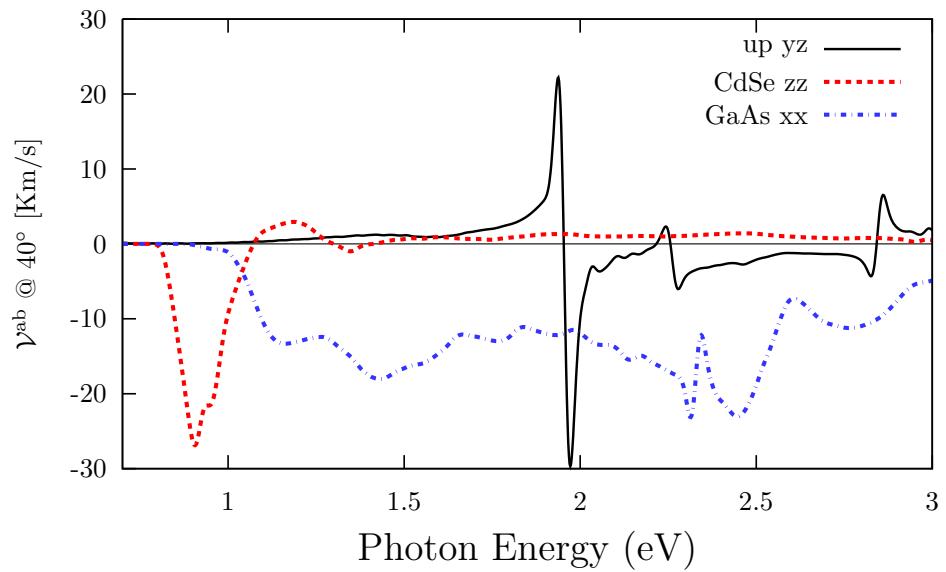

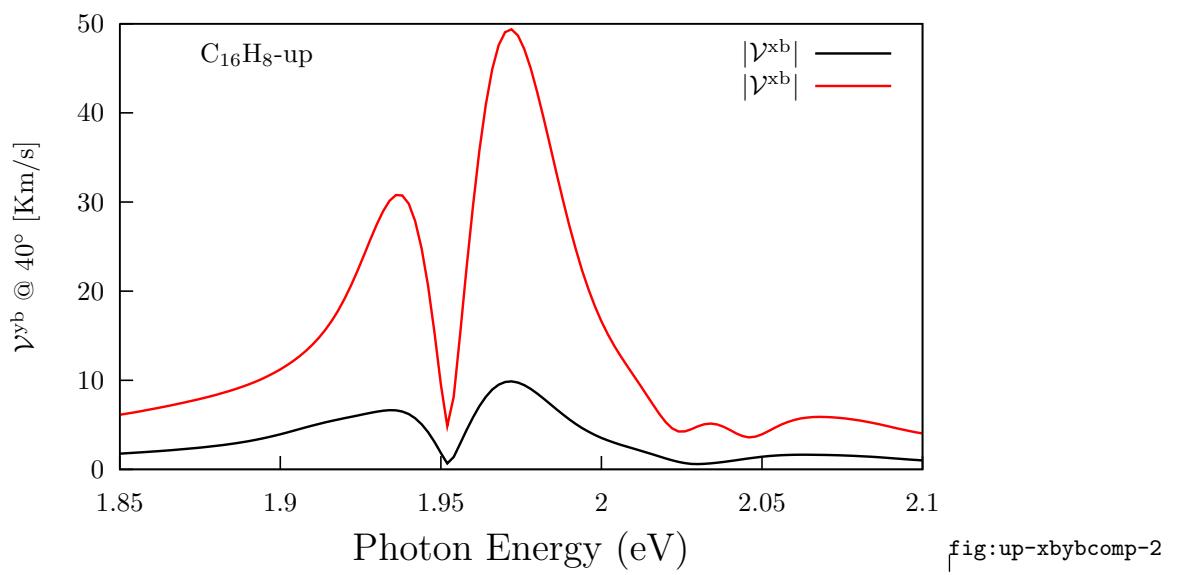

Figure 18: Comparissoin of the most intense response vs the most intense responses of CdSe and GaAs.

`fig:up-comp2`

2 alt

sec:alt

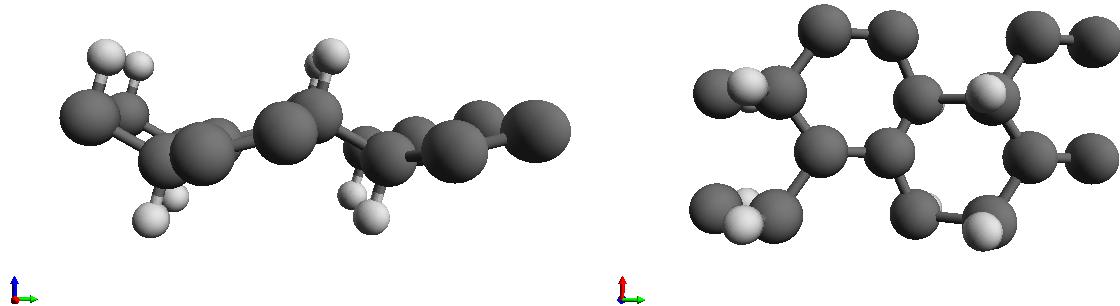

Figure 19: Alt structure.

fig:altstruc

2.1 \mathcal{V}^{xb}

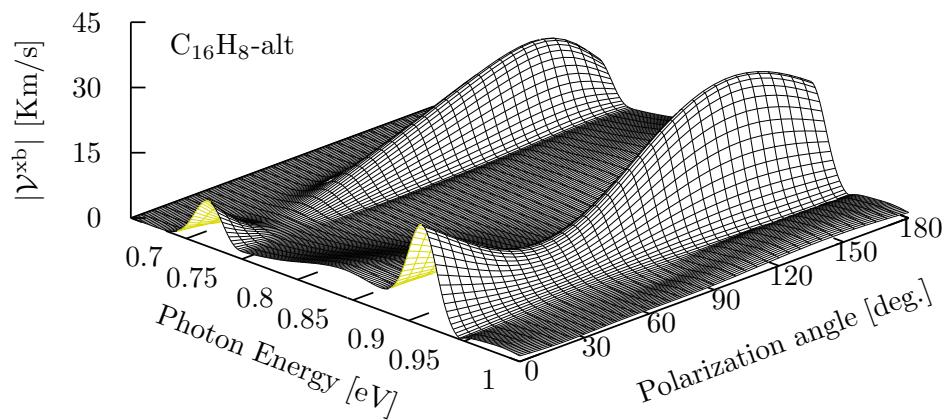

Figure 20: The most intense response for \mathcal{V}^{xb} is for 145° .

fig:alt-magvxbincang

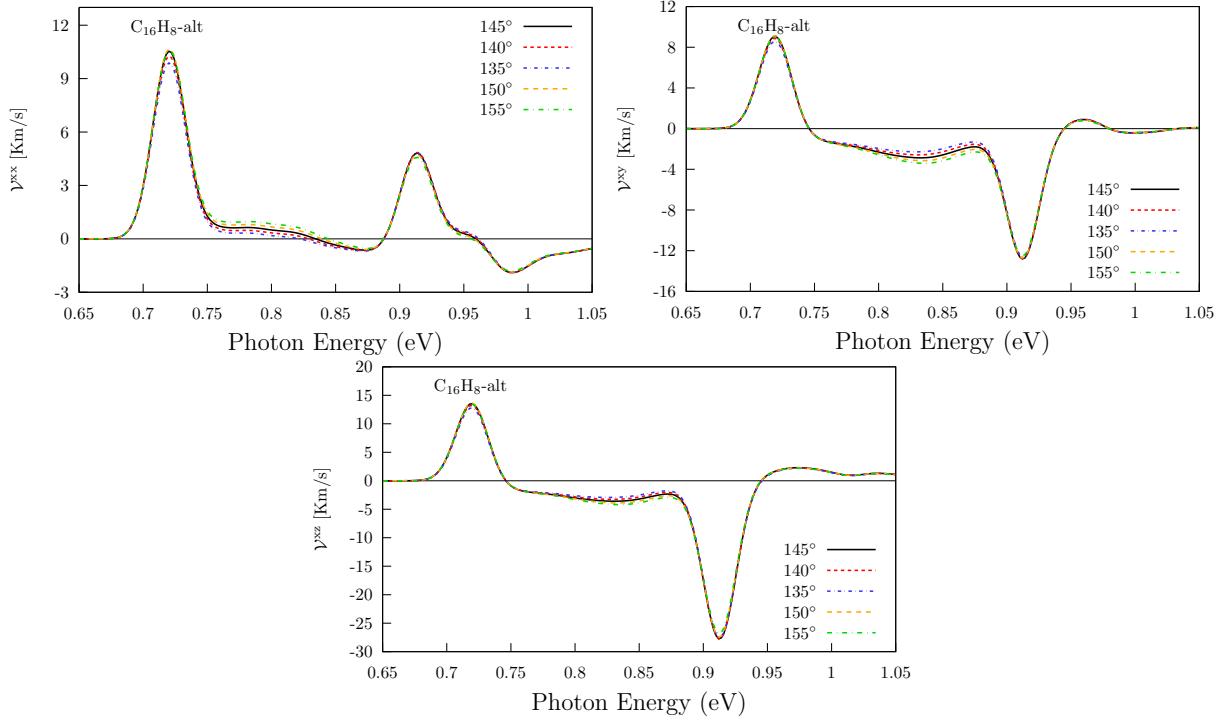

Figure 21: Cheking angle of incidence for xb components.

`fig:alt-xbangcomp`

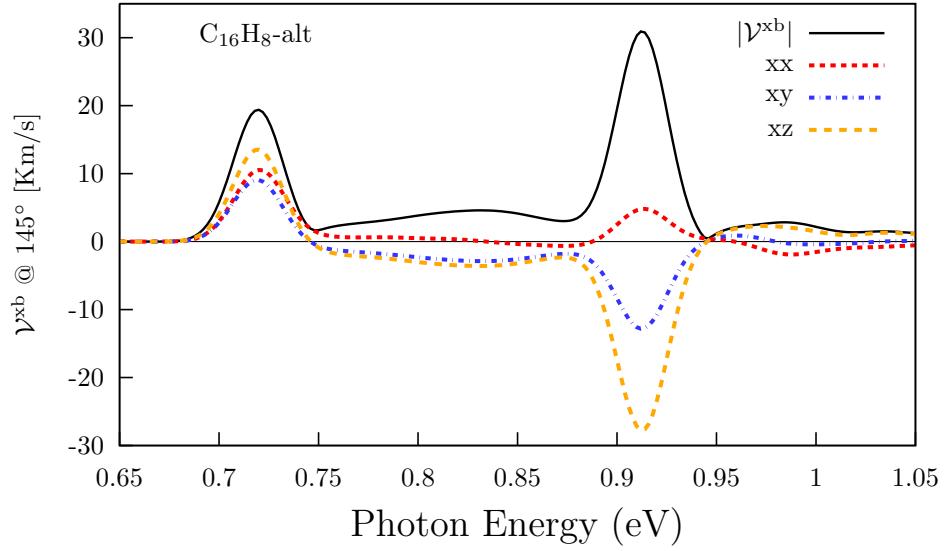

Figure 22: Three components of \mathcal{V}^{xb} @ 145° .

`fig:alt-vxb1`

2.2 \mathcal{V}^{yb}

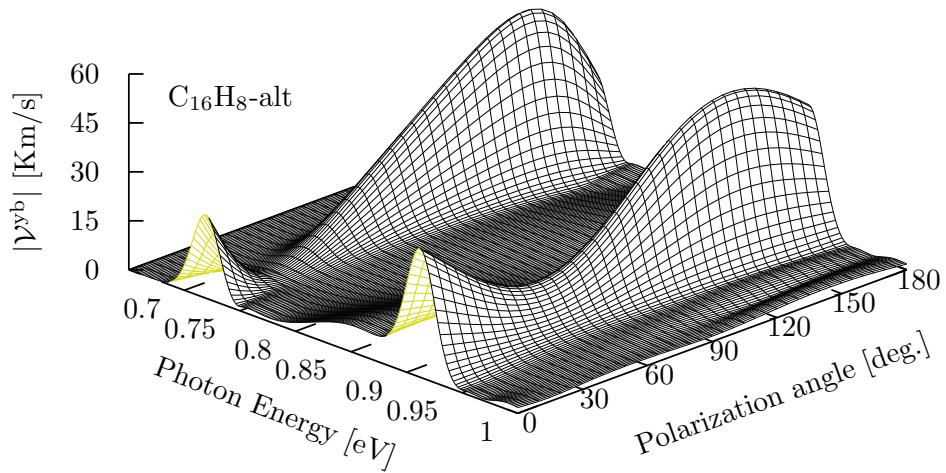

Figure 23: The most intense response for V^{yb} is for 145° .

`fig:alt-magvybincang1`

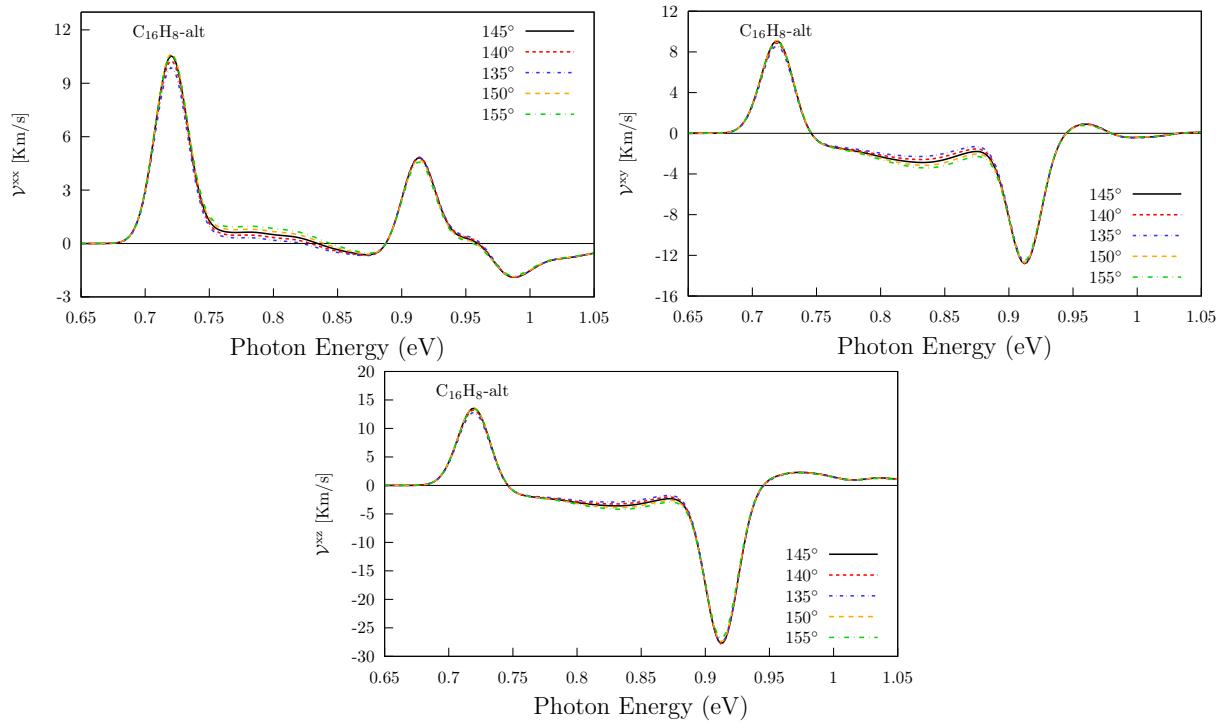

Figure 24: Cheking angle of incidence for yb components.

`fig:alt-ybangcomp`

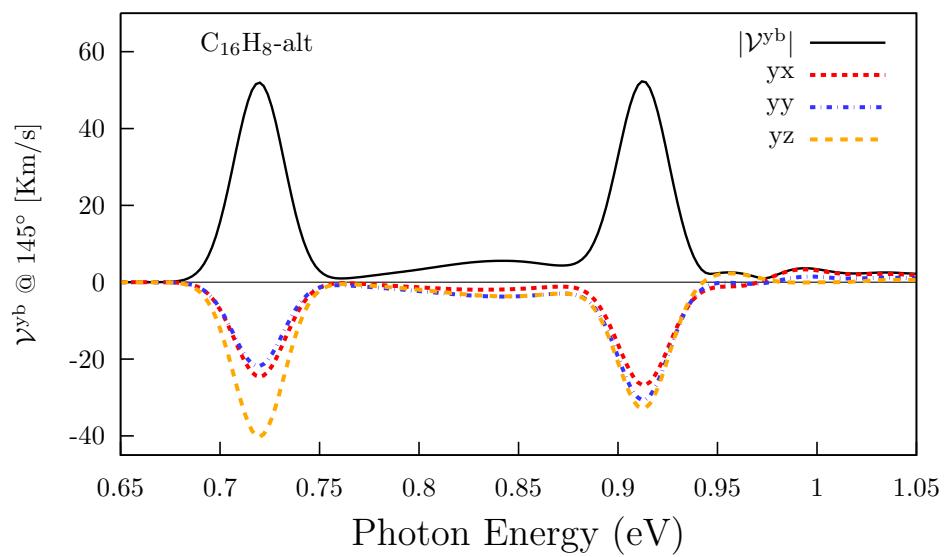

Figure 25: Three components of \mathcal{V}^{yb} @ 145° .

`fig:alt-vyb1`

2.3 $|\mathcal{V}^{ab}|$, angles θ and φ , layers, and comparison with CdSe and GaAs.

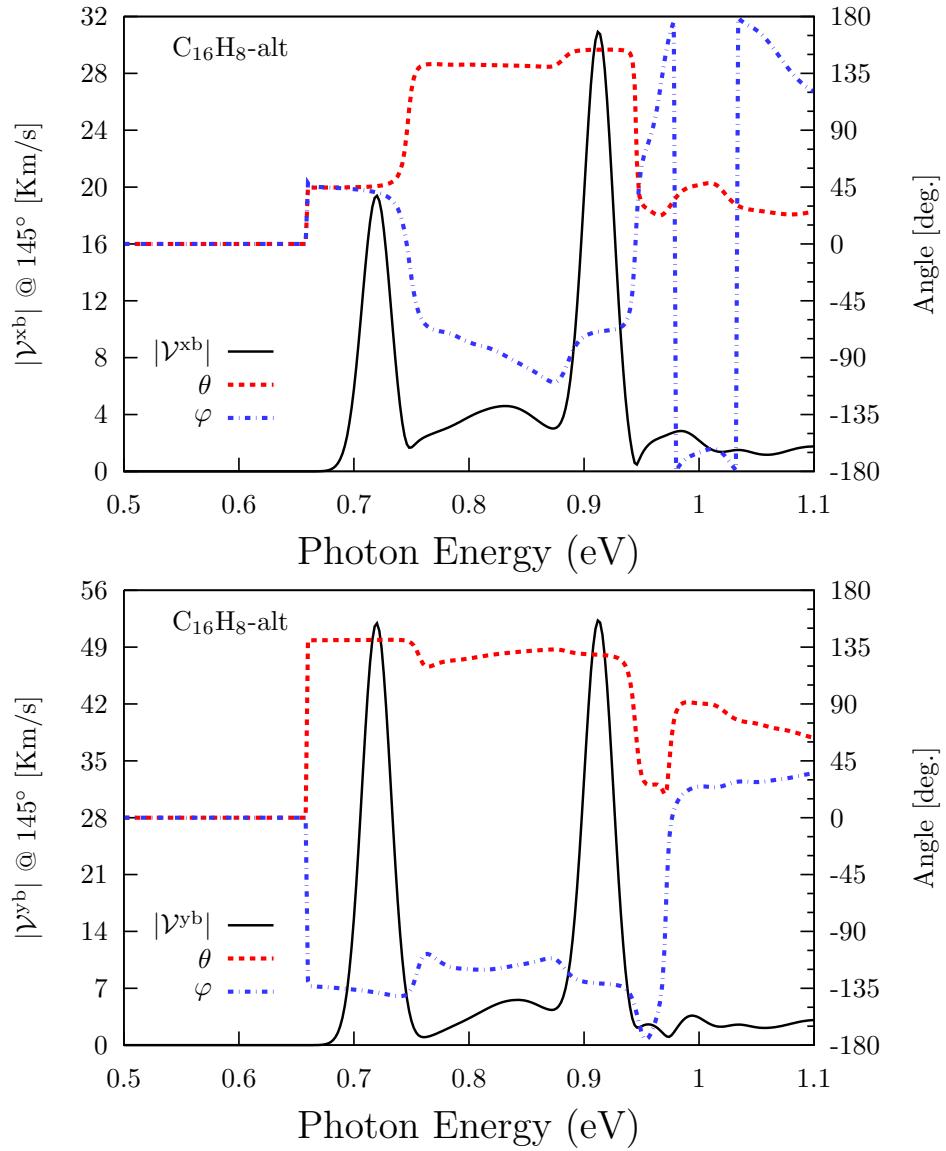

Figure 26: $|\mathcal{V}^{ab}|$ (solid line, leftside scale) and the corresponding angles θ and φ (dashed lines, rightside scale).

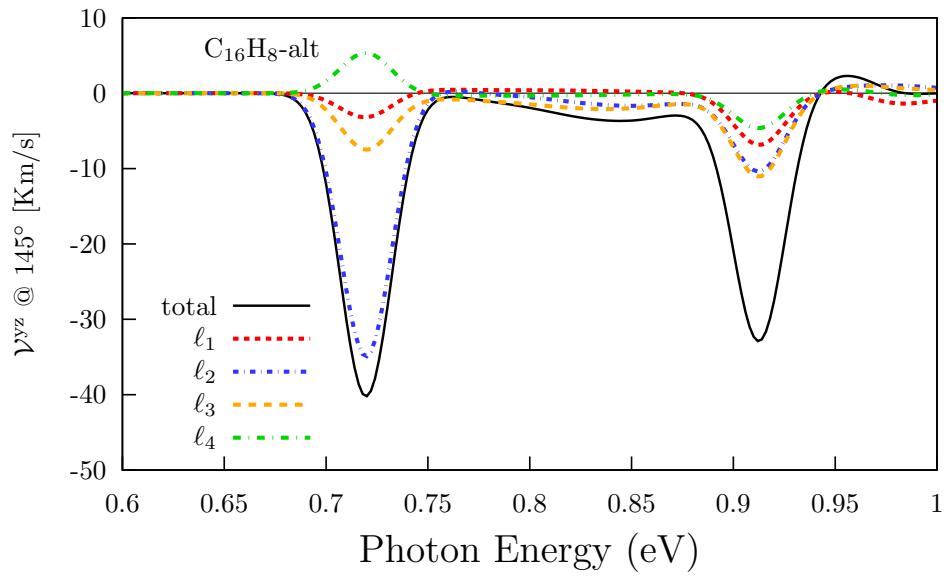

Figure 27: Layer decomposition for the most intense response: \mathcal{V}^{yz} .

fig:alt-lay

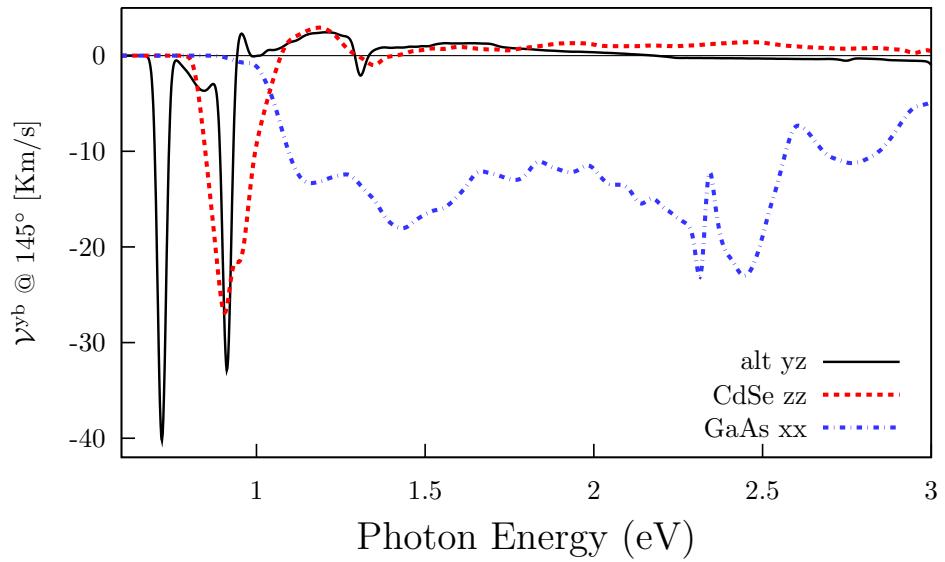

Figure 28: Comparissoin of the most intense response vs the most intense responses of CdSe and $C_{16}H_8$ -alt.

fig:alt-comp

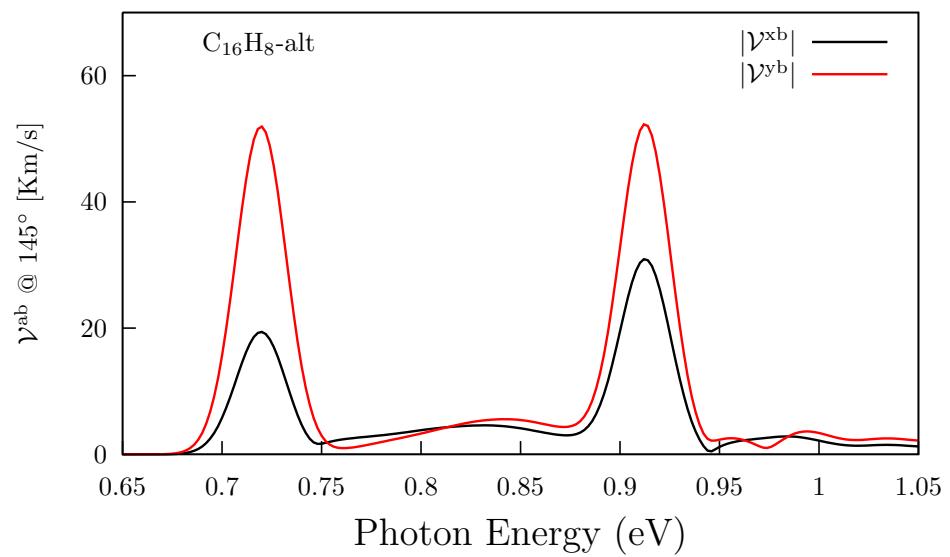

Figure 29: Comparisson of $|\mathcal{V}^{xb}|$ and $|\mathcal{V}^{yb}|$

`fig:alt-xbybcomp`

3 HN₂C₂H-aa

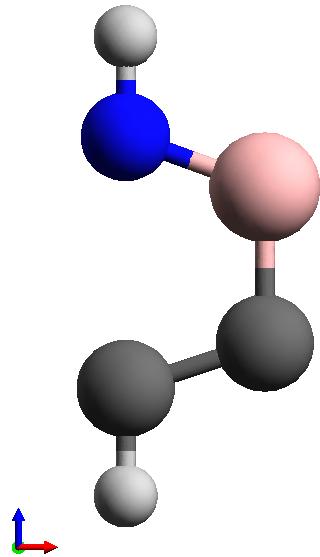

Figure 30: HN₂C₂H-aa structure

fig:aastruc

3.1 \mathcal{V}^{xb}

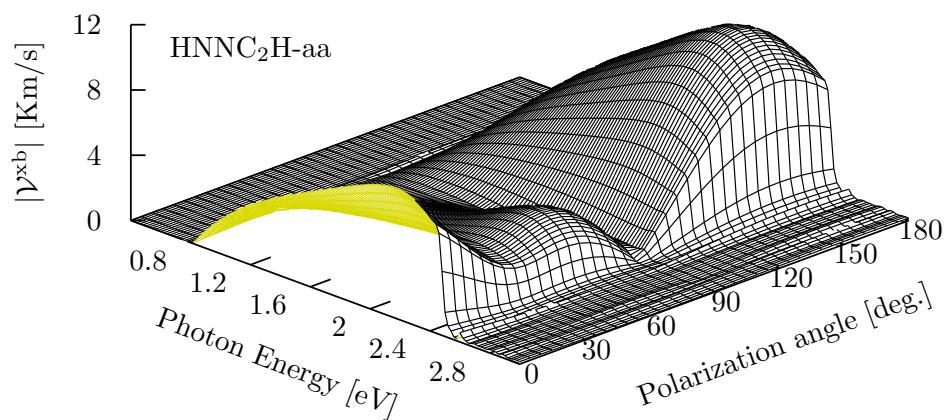

Figure 31: The most intense response for \mathcal{V}^{xb} is for 155° .

fig:aa-magvxbincang

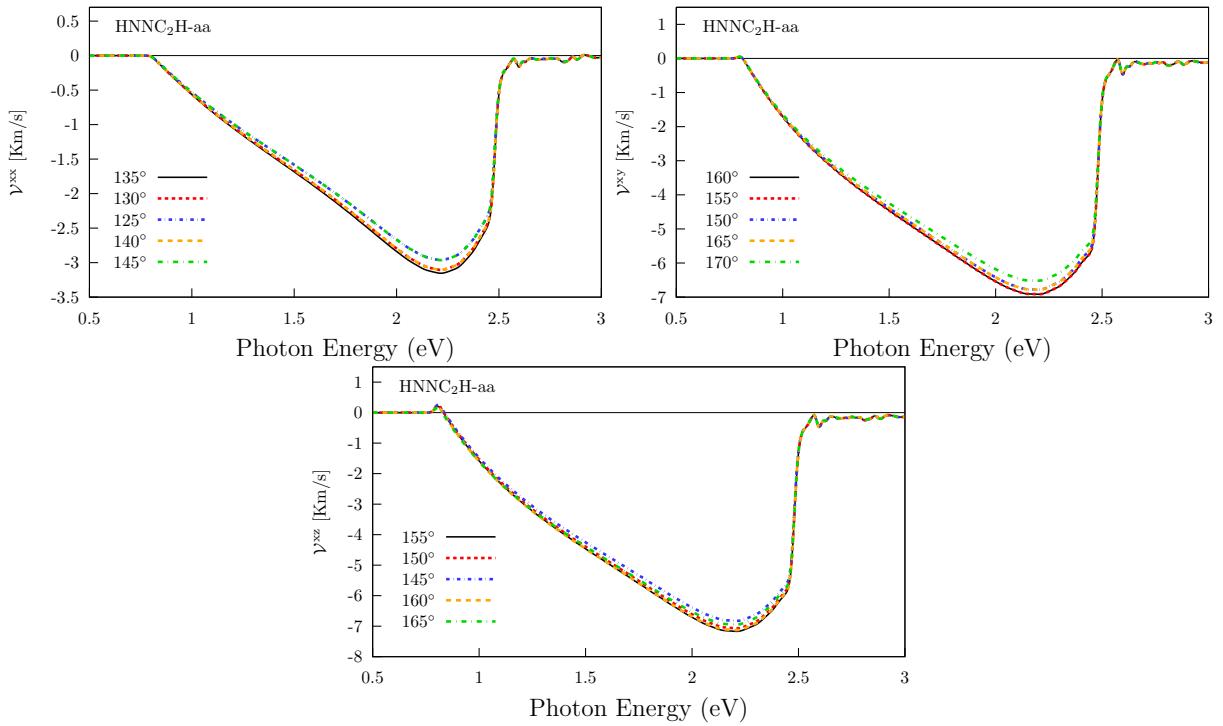

Figure 32: Cheking angle of incidence for xb components. There is a different angle for each component to have the most intense response.

`fig:aa-xbangcomp`

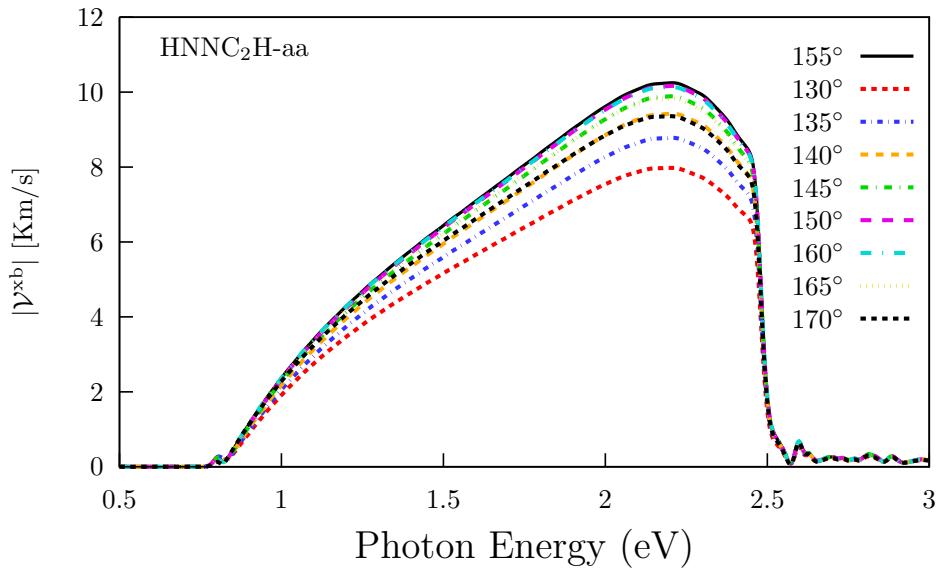

Figure 33: Comparissson of $|V_{x^b}|$ for different polarization angles.

`fig:aa-magvxb`

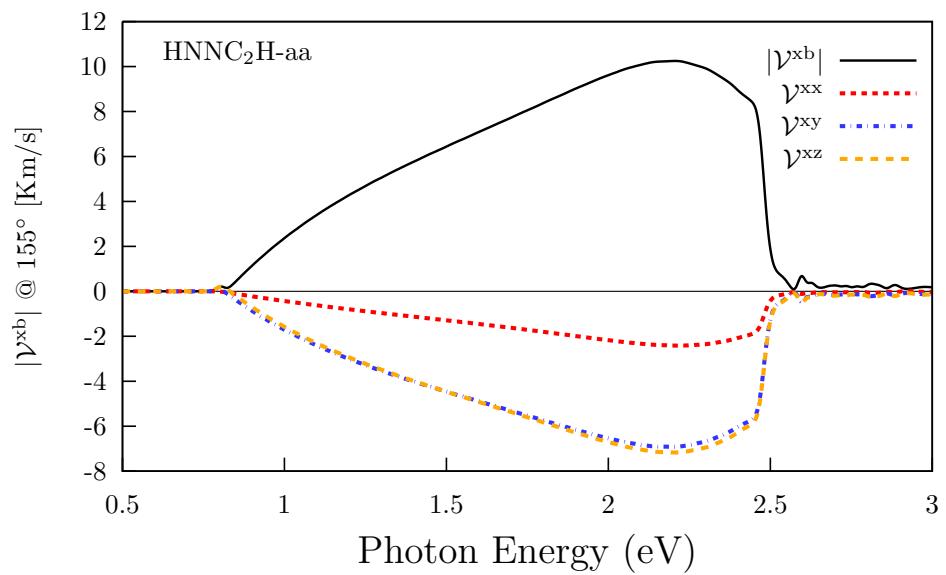

Figure 34: Three components of \mathcal{V}^{xb} @ 155° .

`fig:aa-vxb1`

3.2 \mathcal{V}^{yb}

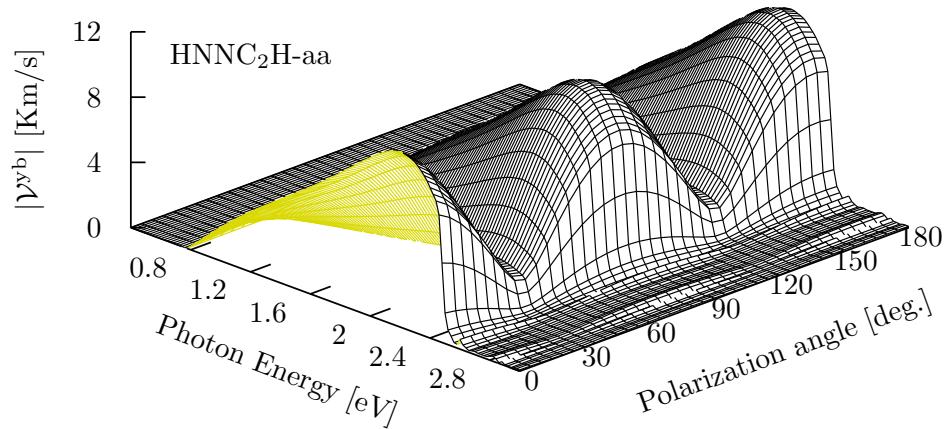

Figure 35: The most intense response for \mathcal{V}^{yb} is for 155° .

`fig:aa-magvybincang`

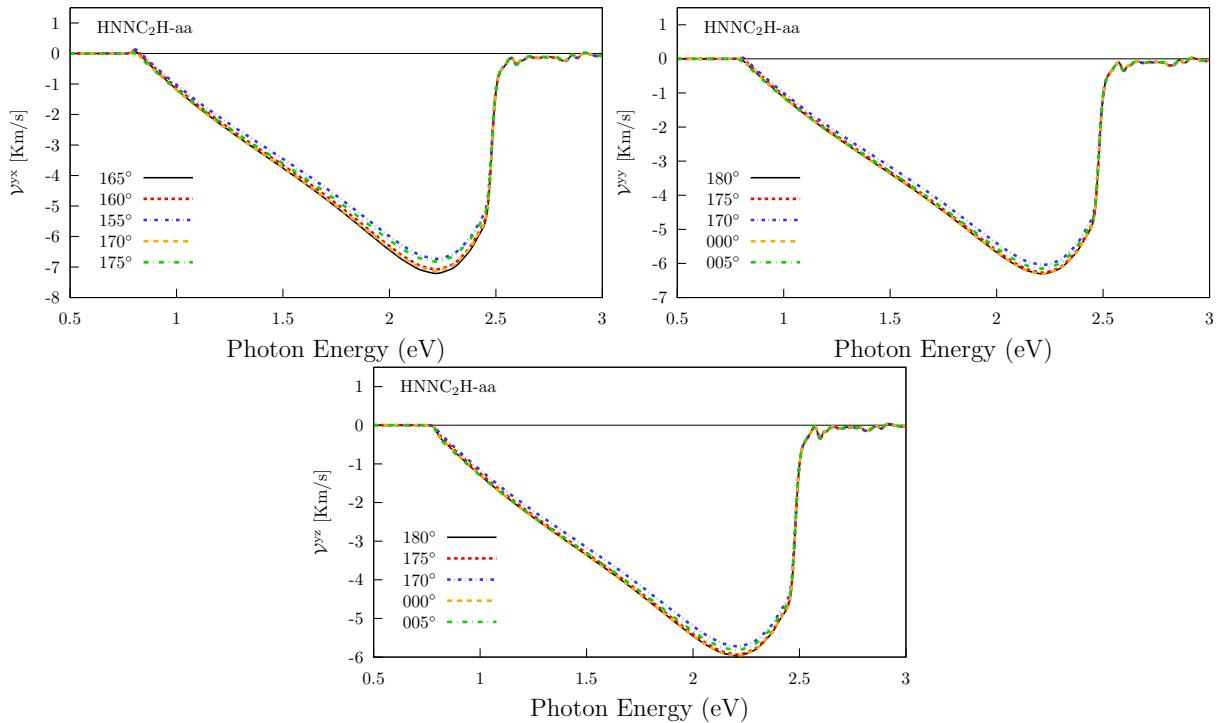

Figure 36: Cheking angle of incidence for y^b components. There is a different angle for each component to have the most intense response.

`fig:aa-ybangcomp`

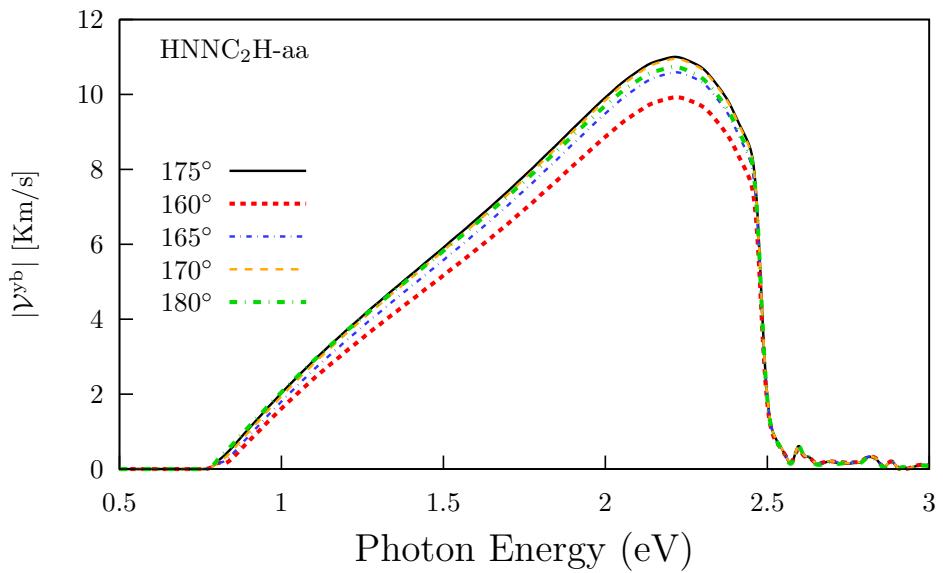

Figure 37: Comparisson of $|V^{yb}|$ for different polarization angles.

`fig:aa-magvyb`

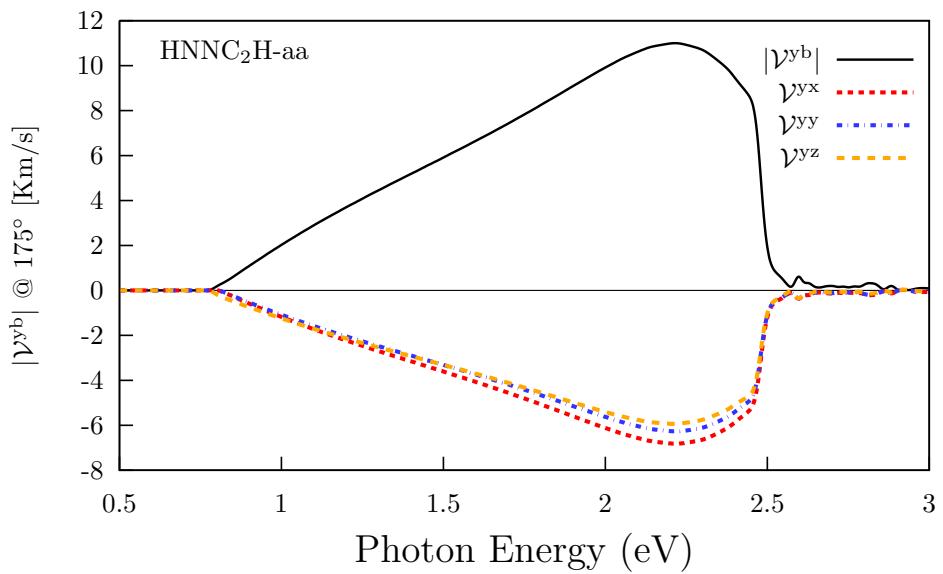

Figure 38: Three components of V^{yb} @ 175° .

`fig:aa-vyb2`

3.3 $|\mathcal{V}^{ab}|$, angles θ and φ , layers, and comparison with CdSe and GaAs.

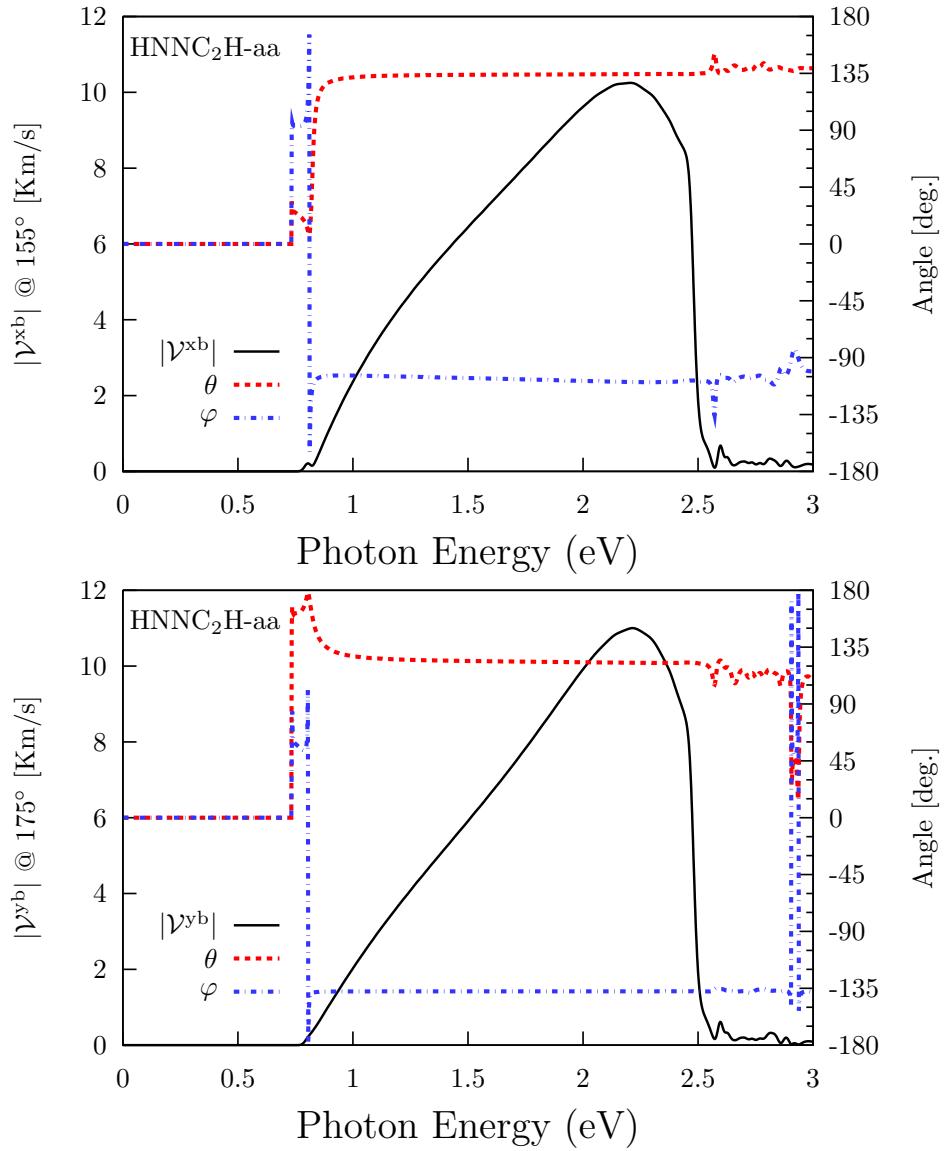

Figure 39: $|\mathcal{V}^{ab}|$ (solid line, leftside scale) and the corresponding angles θ and φ (dashed lines, rightside scale). Fig:aa_rtp

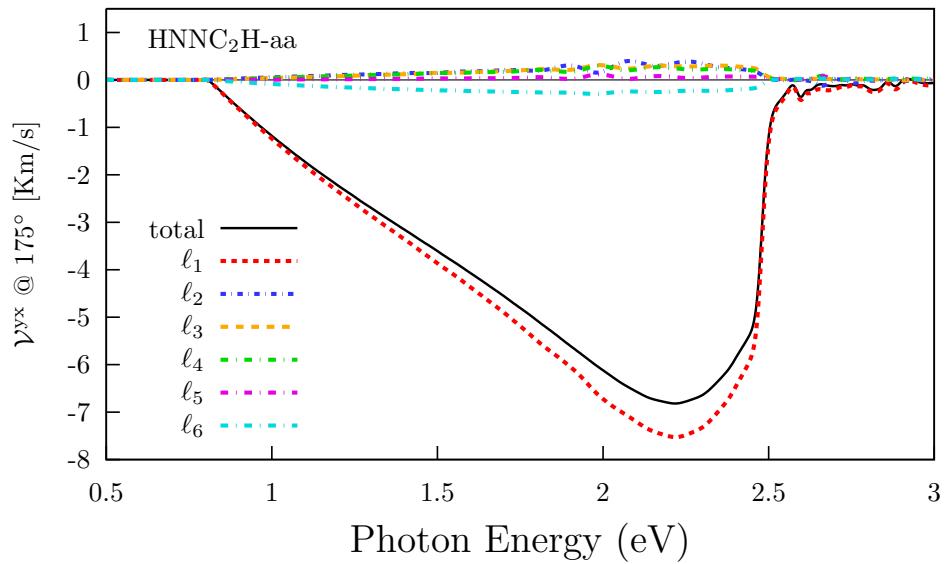

Figure 40: Layer decomposition for the most intense response: \mathcal{V}^{yz} .

[fig:aa-lay](#)

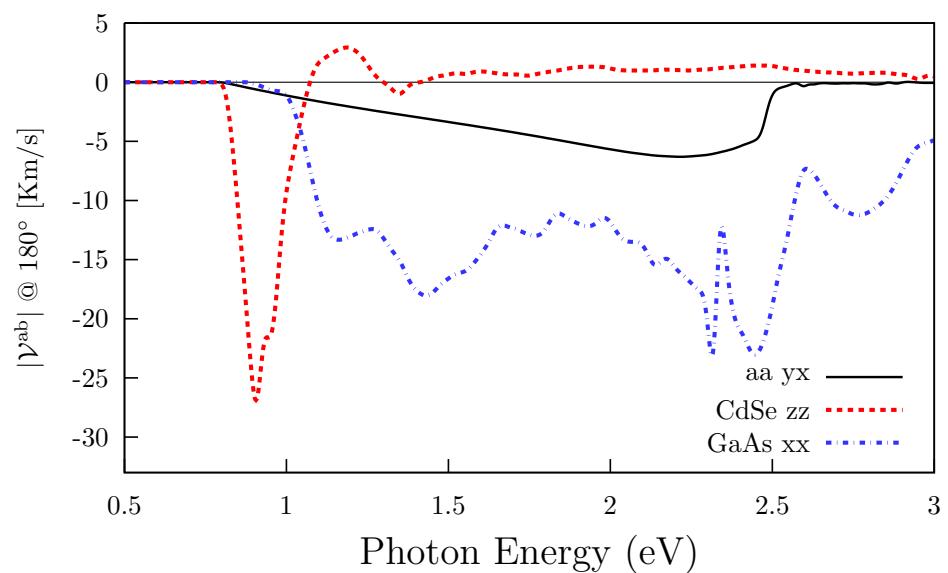

Figure 41: Comparison of the most intense response vs the most intense responses of CdSe and GaAs.

[fig:aa-comp](#)

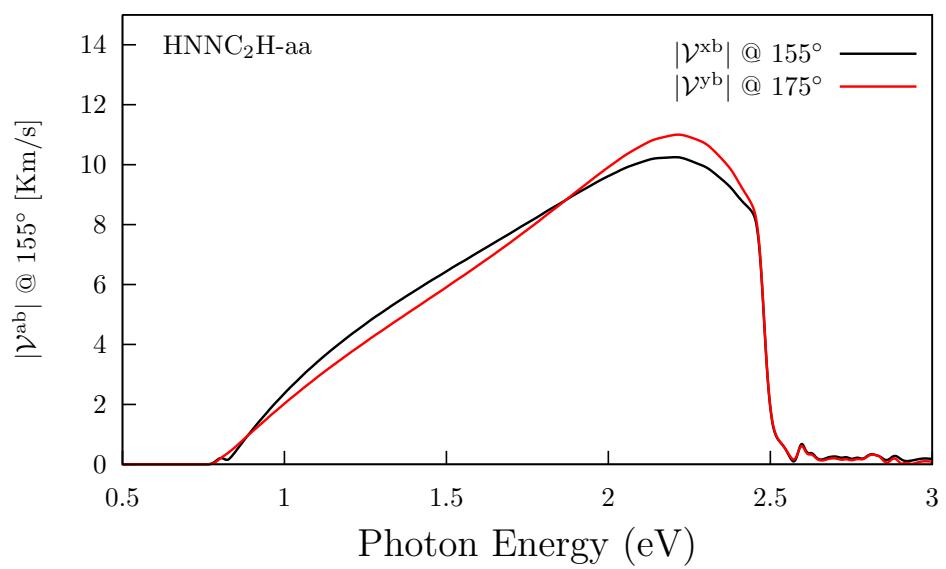

Figure 42: Comparisson of $|\mathcal{V}^{xb}|$ and $|\mathcal{V}^{yb}|$.

`fig:aa-xbybcomp`

4 HN₂C₂H-ab

sec:ab

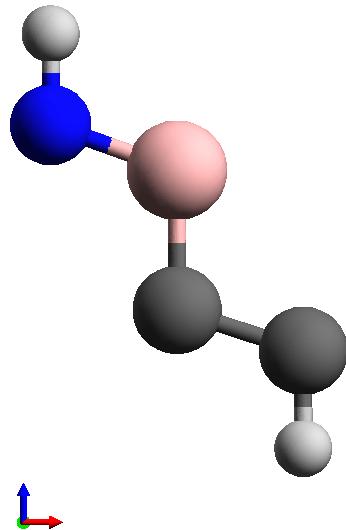

Figure 43: HN₂C₂H-ab structure

fig:abstruc

4.1 \mathcal{V}^{xb}

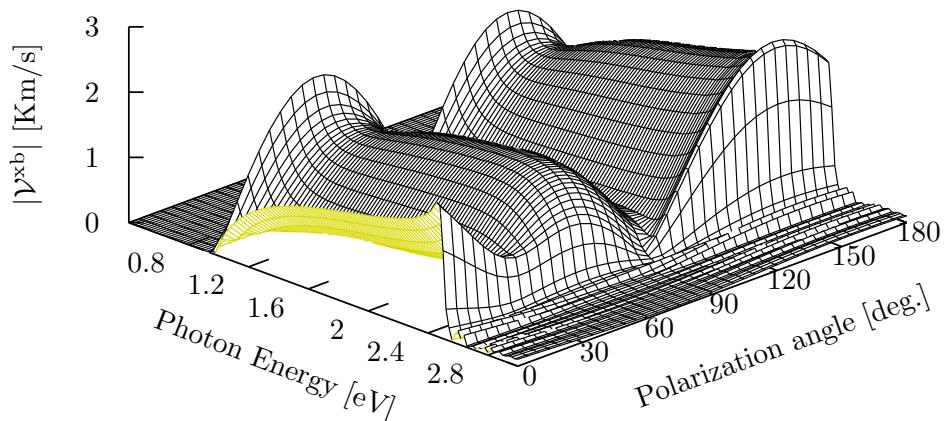

Figure 44: The most intense response for \mathcal{V}^{xb} is for 155° .

fig:ab-magvxbincang

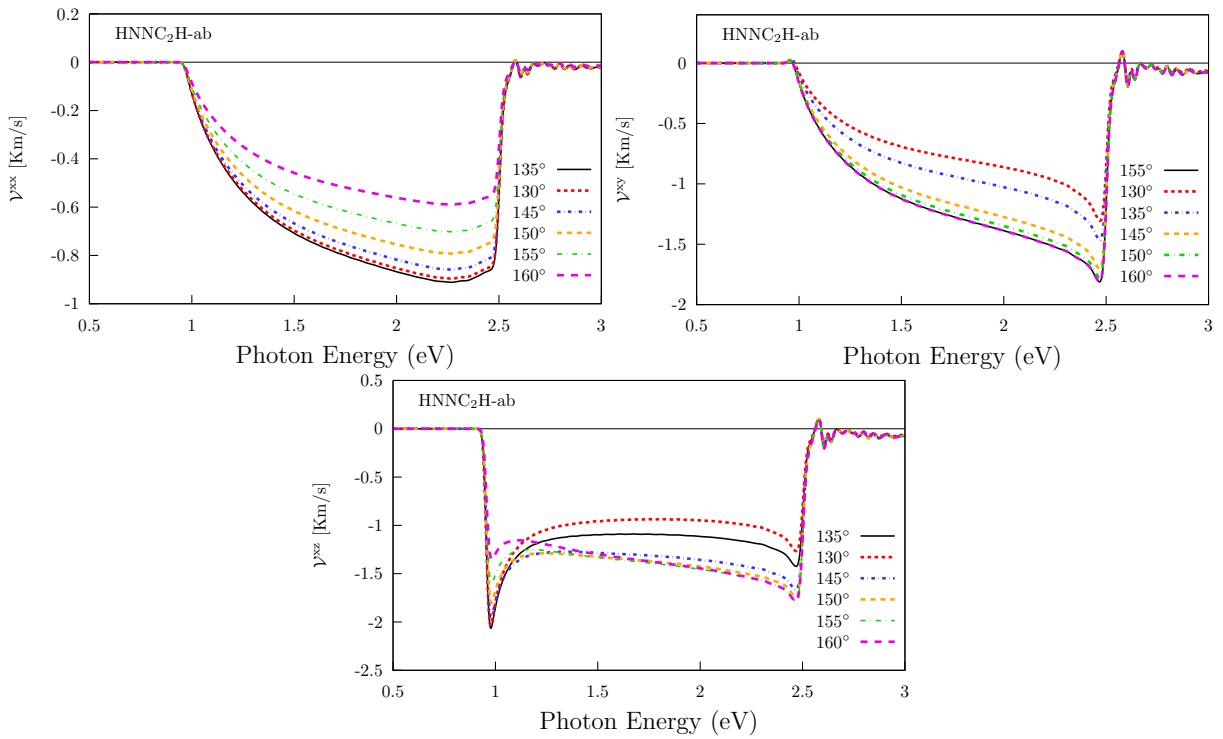

Figure 45: Cheking angle of incidence for xb components. There is a different angle for each component to have the most intense response.
fig:ab-xbangcomp

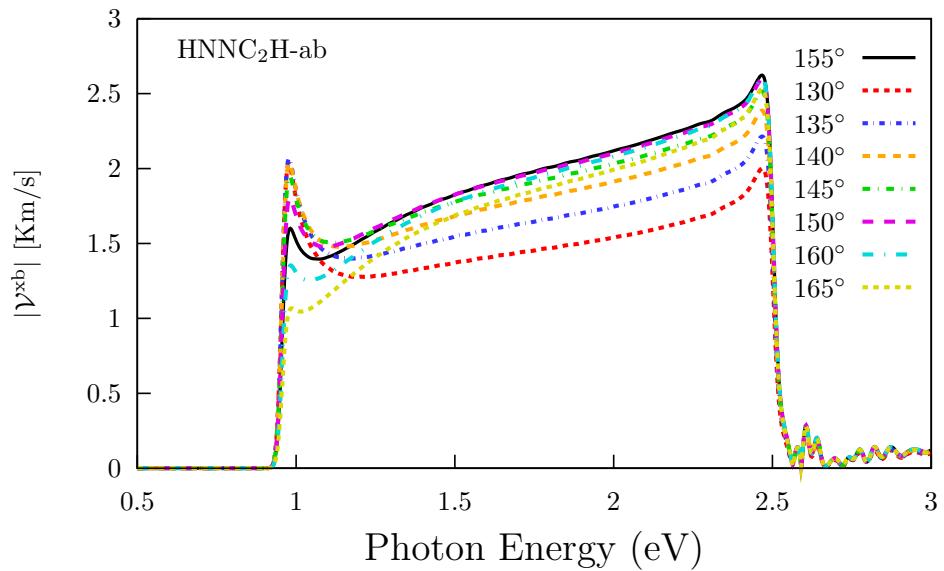

Figure 46: Comparissson of $|V_{xb}|$ for different polarization angles.
fig:ab-magvxb

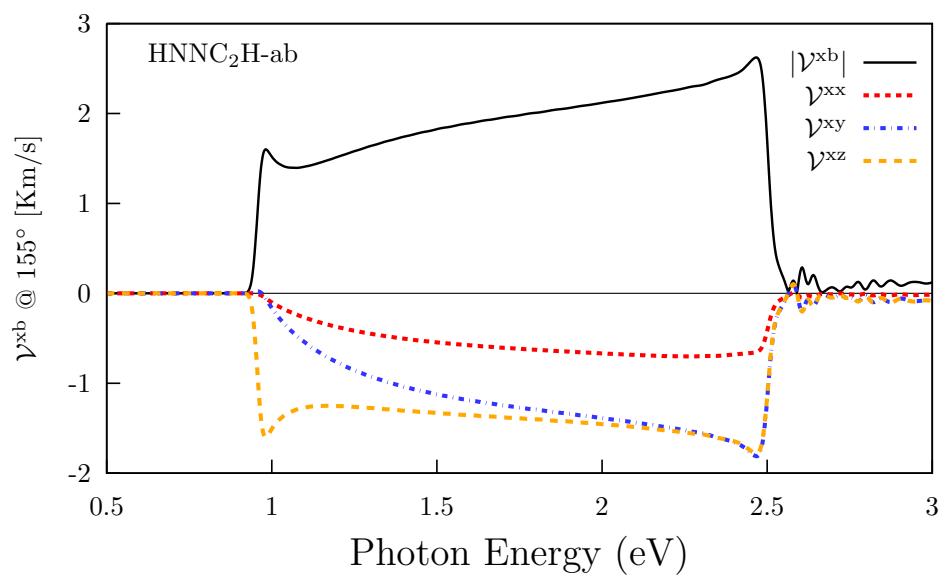

Figure 47: Three components of \mathcal{V}^{xb} @ 155°.

fig:ab-vxb

4.2 \mathcal{V}^{yb}

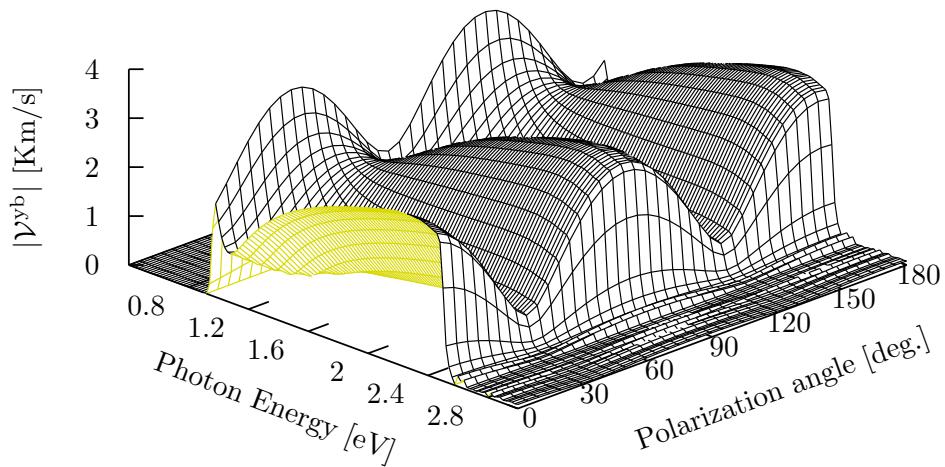

Figure 48: The most intense response for \mathcal{V}^{yb} is for 155° .

`fig:ab-magvybincang`

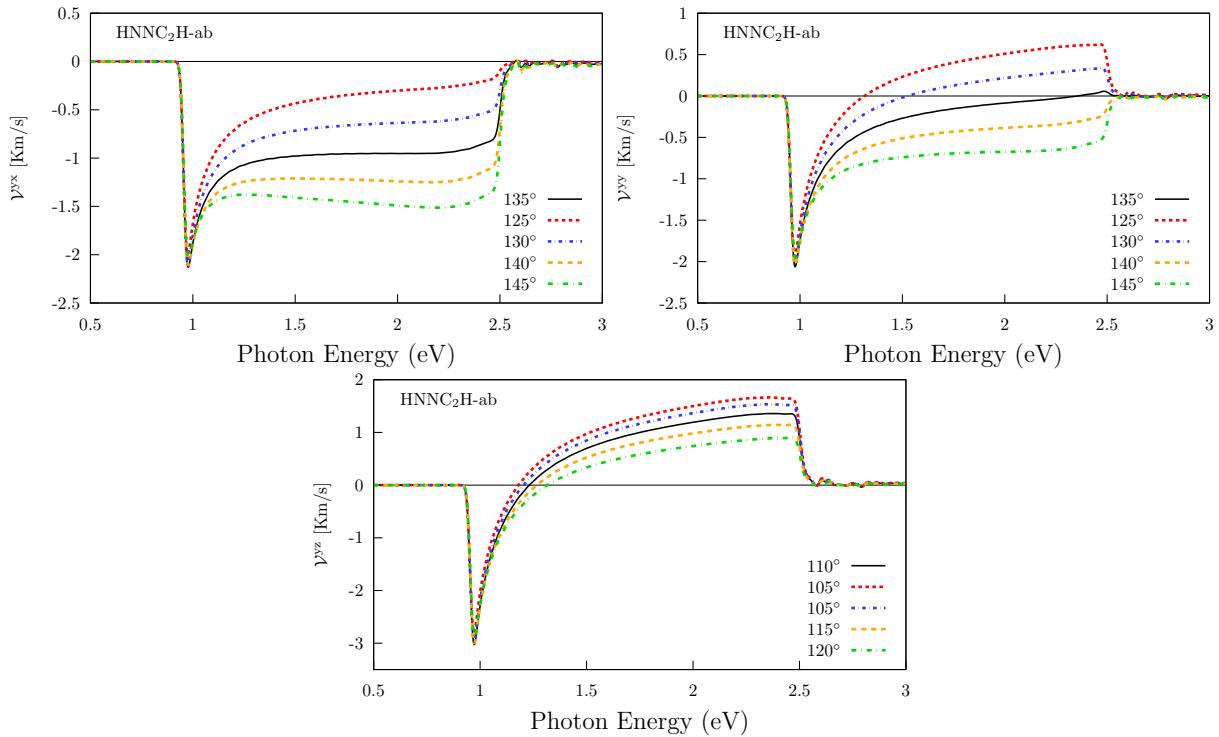

Figure 49: Cheking angle of incidence for yb components. There is a different angle for each component to have the most intense response.

`fig:ab-ybangcomp`

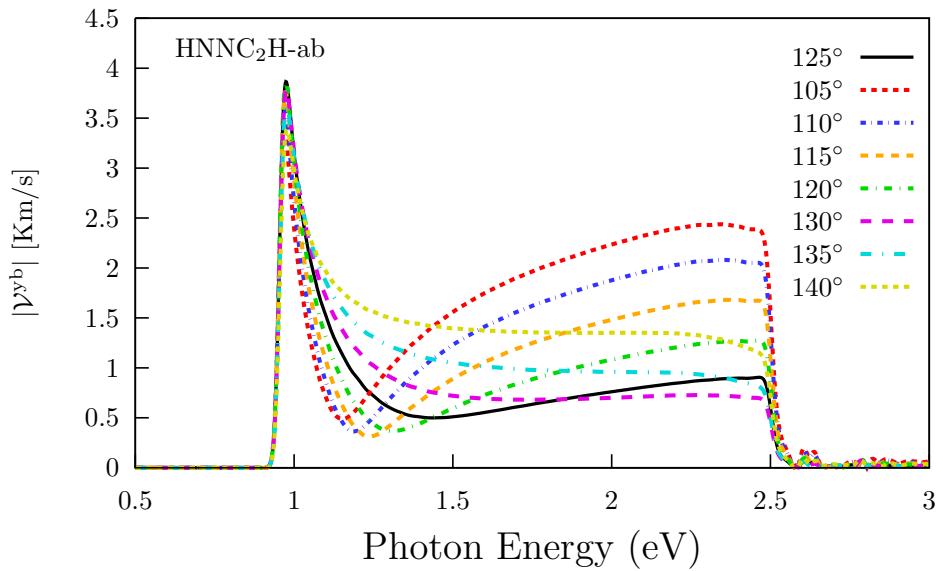

Figure 50: Comparisso[n of $|V^{yb}|$ for different polarization angles.

`fig:ab-magvyb`

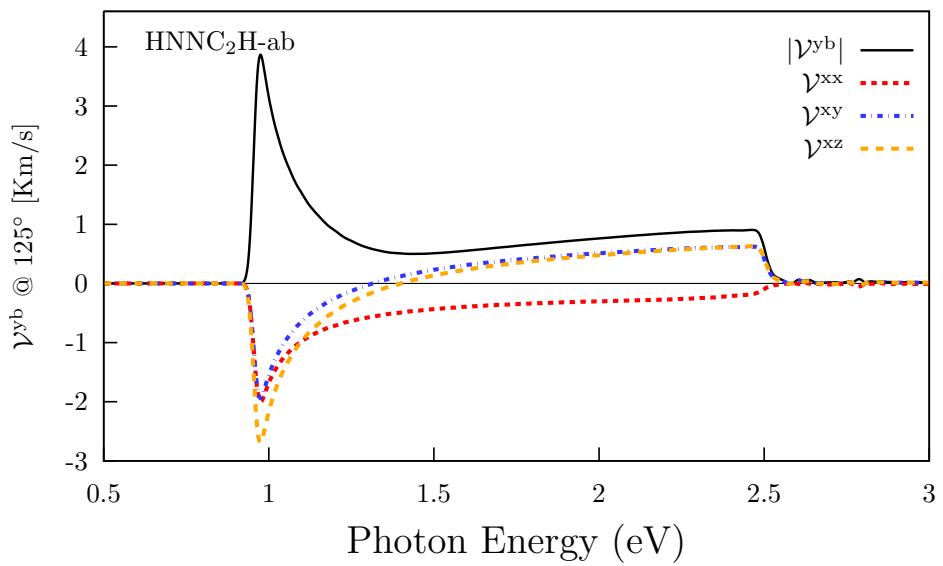

Figure 51: Three components of V^{yb} @ 125° .

`fig:ab-vyb`

4.3 $|\mathcal{V}^{ab}|$, angles θ and φ , layers, and comparison with CdSe and GaAs.

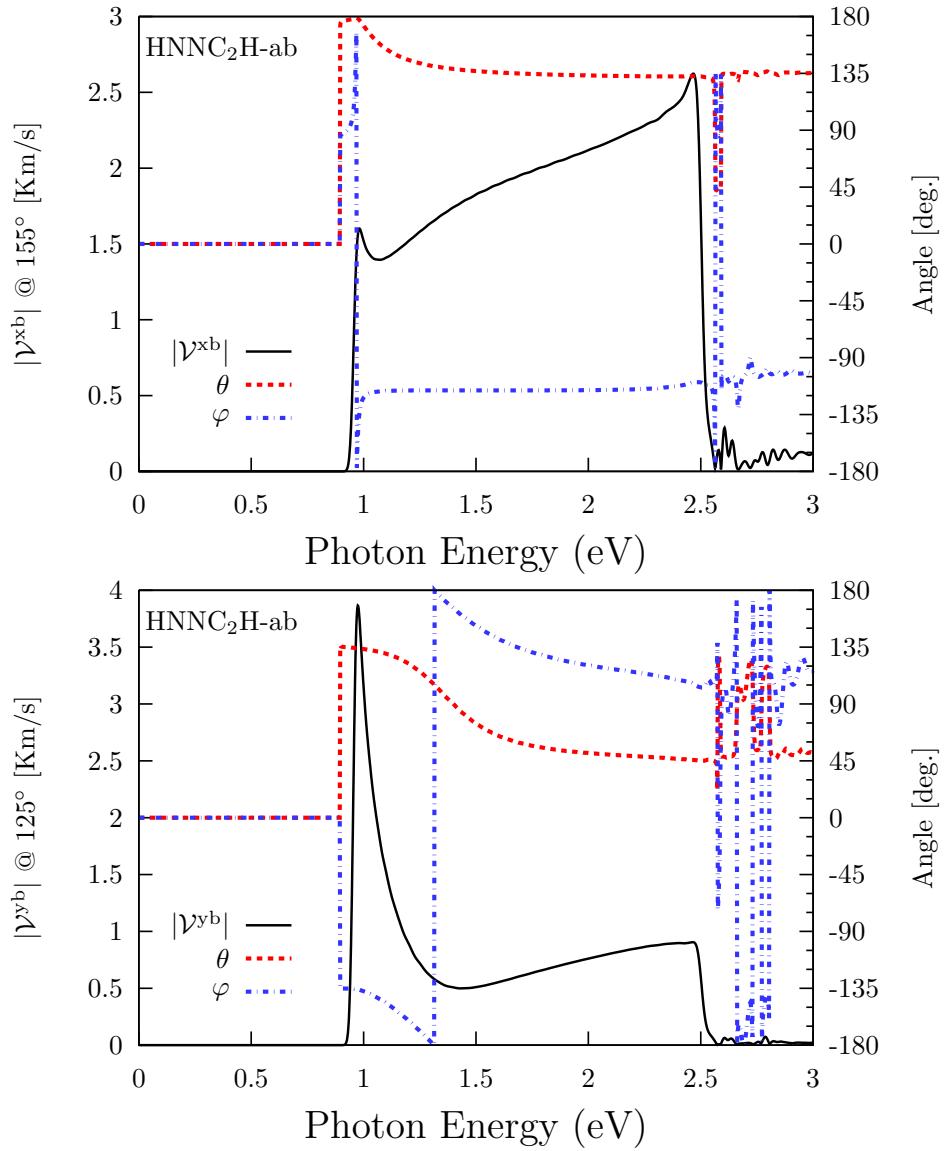

Figure 52: $|\mathcal{V}^{ab}|$ (solid line, leftside scale) and the corresponding angles θ and φ (dashed lines, rightside scale). Fig:ab_rtp

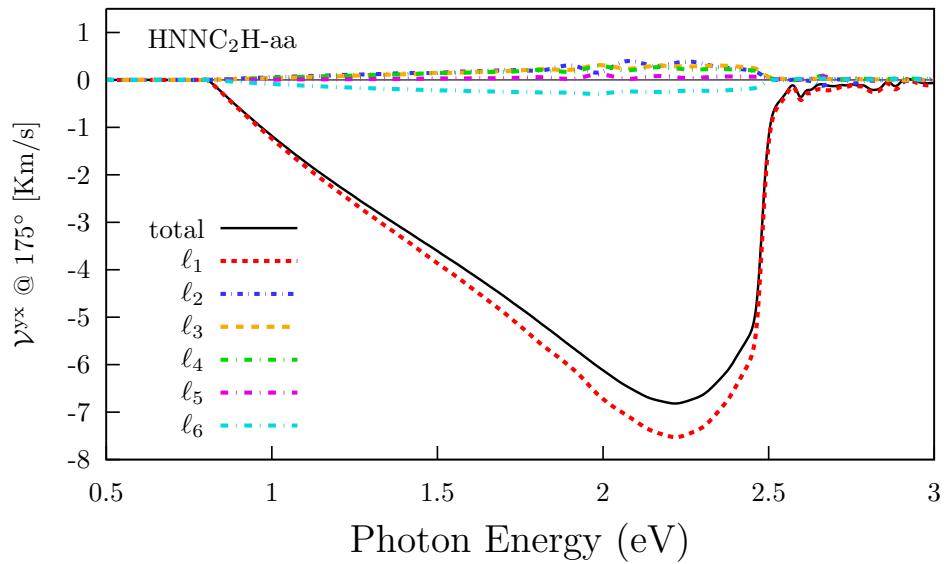

Figure 53: Layer decomposition for the most intense response: \mathcal{V}^{yz} .

[fig:aa-lay](#)

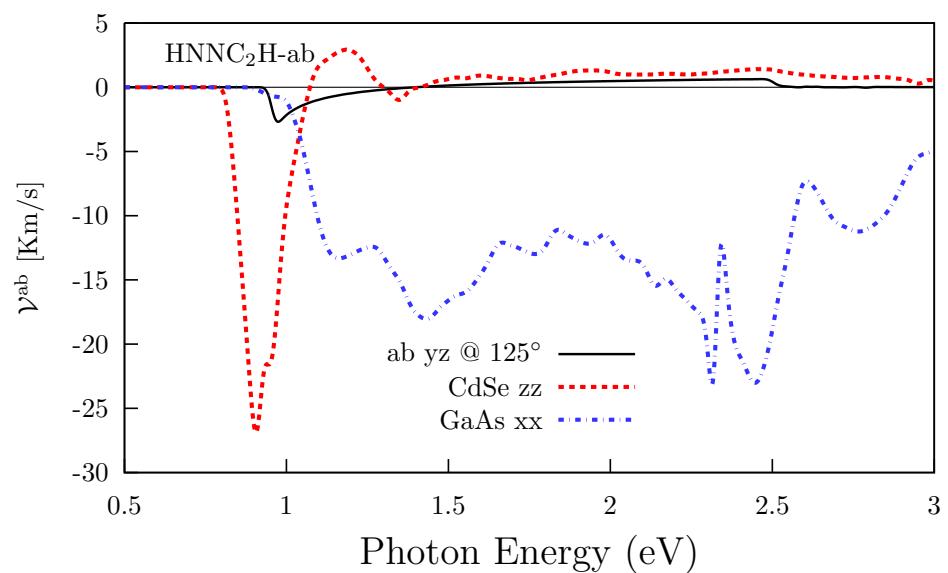

Figure 54: Comparissoin of the most intense response vs the most intense responses of CdSe and GaAs.

[fig:ab-comp](#)

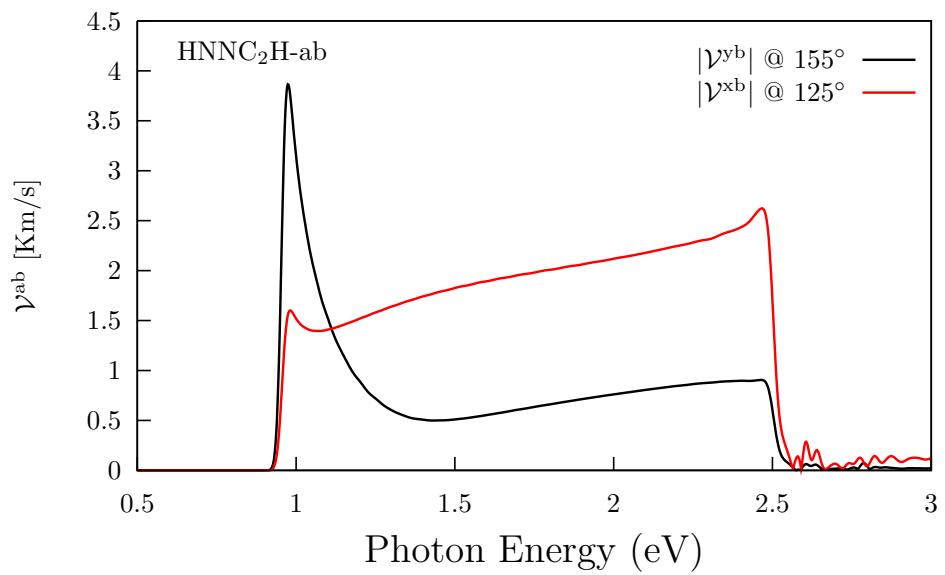

Figure 55: Comparisson of $|\mathcal{V}^{xb}|$ and $|\mathcal{V}^{yb}|$.

`fig:ab-xbybcomp`
